Assessment Of Aphasia Assessment Of Aphasia

**Harold Goodglass, Edith
Kaplan, Barbara Barresi**

Assessment Of Aphasia Assessment Of Aphasia:

Assessment of Aphasia Otfried Spreen, Anthony H. Risser, 2002-11-21 Spreen and Risser present a comprehensive critical review of available methods for the assessment of aphasia and related disorders in adults and children. The authors explore test instruments and approaches that have been used traditionally for the diagnosis of aphasia ranging from bedside screening and ratings to tests of specific aspects of language and to comprehensive and psychometrically standardized aphasia batteries. Coverage of other methods reflects newer trends including the areas of functional communication testing of bilingual patients, psycholinguistic approaches and pragmatic and discourse related aspects of language in everyday life. The authors also examine the expansion of language assessment to individuals with non aphasic neurological disorders such as patients with traumatic brain injury, lesions of the right hemisphere, the healthy elderly and individuals with dementia. Taking a flexible and empirical approach to the assessment process in their own clinical practice, Spreen and Risser review numerous test instruments and their source for professionals and students in training to choose from in their own use. The introductory chapters cover the history of aphasia assessment, a basic outline of subtypes of aphasia both neuro anatomically and psycholinguistically and the basic psychometric requirements for assessment instruments. The final part discusses issues in general clinical practice specifically questions of test selection and interpretation. The book is a thorough and practical resource for speech and language pathologists, neuropsychologists and their students and trainees.

The Assessment of Aphasia and Related Disorders Harold Goodglass, Edith Kaplan, Barbara Barresi, 2001. The Boston Diagnostic Aphasia Examination Set is a group of eight products that helps clinicians distinguish among neurologically recognized aphasic syndromes. This widely used set of tools is an imperative instrument for assessing the impairment of aphasia. It is a common language for researchers and clinicians and a source from which knowledge about aphasia has flourished. New features of the third edition include a carefully standardized short version that offers a brief assessment, supplemental measures incorporated into test materials, new statistical bases for the revised examination and a fully updated edition of the text. The Assessment of Aphasia and Related Disorders. Other products in the Boston Diagnostic Aphasia Examination Set include the Stimulus Cards, Record Booklet, Stimulus Cards Short Form, Short Form Record Booklet, Boston Naming Test, the Boston Naming Test Record Booklet and the Examining for Aphasia with the BDAE video.

Assessment of Bilingual Aphasia Michel Paradis, Gary Libben, 2014-03-05 The Bilingual Aphasia Test is a comprehensive language test designed to assess the differential loss or sparing of various language functions in previously bilingual individuals. The individual is tested separately in each language he or she previously used and then in the two languages simultaneously. The testing is multimodal, sampling hearing, speaking, reading, and writing, and multidimensional, testing various linguistic levels: phonological, morphological, syntactic, lexical, and semantic tasks, comprehension, repetition, judgment, lexical access, and propositionizing, and units: words, sentences, and paragraphs. The BAT is structured as follows: To test a bilingual aphasic, you will need the following testing elements: the stimulus books for each of the languages in which the individual was formerly fluent; the single language tests for each of these languages; as well as the bilingual test that links them. For example, if you are testing an English-French bilingual aphasic, you will need an English stimulus book, a French stimulus book, an English single language test, a French single language test, and an English-French bilingual test. The BAT can also be used to test monolingual aphasics. To test for monolingual aphasia, you will need the stimulus book and the single language test in the language in which the individual was formerly fluent. Professor Paradis' book, *The Assessment of Bilingual Aphasia*, provides the background material and serves as the manual for the test. The BAT is available in dozens of languages and language pairs. There are now 106 bilingual pairs available. Additional single language and bilingual tests are being prepared continuously. If the language or language pair you need is not listed, please call LEA to find out if and when it will be available.
