Bristows Helicopters:

Alan Bristow, Helicopter Pioneer Alan Bristow, Patrick Malone, 2010-03-10 You could be forgiven for taking Bristow's story as the invention of an action thriller writer. One of the best flying books you'll ever read. Pilot Magazine. Alan Bristow was a truly remarkable man. As a merchant navy officer cadet during the war, he survived two sinkings, played a part in the evacuation of Rangoon and was credited with shooting down two Stukas in North Africa. He joined the Fleet Air Arm and trained as one of the first British helicopter pilots, becoming the first man to land a helicopter on a battleship and Westland's first helicopter test pilot. He flew in France, Holland, Algeria, Senegal and elsewhere, narrowly escaping many helicopter crashes before winning the Croix de Guerre, evacuating wounded French soldiers in Indochina. For four years he flew for Aristotle Onassis's pirate whaling fleet in Antarctica before joining Douglas Bader and providing support services to oil drillers in the Persian Gulf. Out of that grew Bristow Helicopters Ltd, the largest helicopter company in the world outside America. Bristow's circle included the great helicopter pioneers such as Igor Sikorsky and Stan Hiller, test pilots like Harold Penrose and Bill Waterton, Sheiks and Shahs and political leaders, business giants like Lord Cayzer and Freddie Laker and the author James Clavell, a lifelong friend whose book *Whirlwind* was a fictionalized account of Bristow's overnight evacuation of his people and helicopters from revolutionary Iran. Bristow precipitated the Westland Affair when he made a takeover bid which eventually led to the resignation of Michael Heseltine and Leon Brittain and almost to the downfall of Margaret Thatcher. Has all the ingredients of a bestselling novel. *Firetrench* Helicopters and North Sea Oil Peter Saxton, 2023-11-23 A series of personal accounts by highly trained helicopter pilots including those with distinguished careers in the military and commercial flying who, with divers, ensured that essential staff could operate in North Sea oil exploration and oil supply. They were the vital link in the process and operated in the most challenging circumstances, often in high levels of danger and sometimes with loss of life, for example the Piper Alpha Disaster which made national news. And the ferrying of essential personnel and supplies could involve rescues as well as routine flying missions. The narrative is often technical but written to ensure good understanding for lay readers and it will, of course, appeal to the many with flying experience in the forces, in commercial flying and government service. Above all, it is a series of graphic personal stories as recounted by individuals faced with extremes of climate, weather, technical engineering and aeronautical problems and often with human life at stake. The people come to life and, with domestic and social concerns and interests, are real and believable people. It is history of the North Sea oil episode in UK political and economic history and in conjunction with international oil politics is of huge importance to Britain's economy. This is a period of progress to domestic oil independence by about 1984 and so a key period with subsequent importance even to the present. All aspects of the operations are covered within individual stories and include the broader questions of company policy, regulation and trade union involvement. **On the Wire** Dave Peel, 2011-05-27 Since qualifying as a Royal Navy Search and Rescue Diver and Aircrewman at the beginning of the seventies
