Based on martelé

Solid staccato is like a series of rapid martol strokes all in one bow."

- When there are only a few strokes in each bow, make very heavy bites at the beginning of each staccato
 by catching the string heavily, and immediately play the rest of the stroke piano. As more and more
 strokes are added, gradually play with a smaller and smaller bite.
- Play with the same curved stroke as in the previous exercise.
- Feel how the stick wants to become out of the string after each attack, even when there are many strokes all in one bow and the bite has become very slight.

Play on each string.

String crossings

String crossings can spoil an otherwise good staccato. This exercise covers all the possibilities in the same way as Exercise 53.

- Play with a metronome, beginning slowly at ... = 60 and gradually increasing to ... = 120.
- Play up- and down-bow, in the upper half throughout.
- Play with a strong rhythmic pulse, practising with a strong accent at the beginning of every group of four notes. Later, feel the accents without sounding them.

Basics Simon Fischer, 1997 The volume includes a general introduction instruction for the individual exercises a general index and an index of musical examples Teaching Violin, Viola, Cello, and Double Bass Dijana Ihas, Miranda Wilson, Gaelen McCormick, 2023-11-23 Teaching Violin Viola Cello and Double Bass summarizes three centuries of string pedagogy treatises to create a comprehensive resource on methods and approaches to teaching all four bowed string instruments Co written by three performance and pedagogy experts each specializing in different string instruments this book is applicable to all levels of instruction Essays on historical pedagogues are clearly structured to allow for easy comprehension of their philosophies pedagogical practices and unique contributions. This book concludes with a section on application through comparative analysis of the historical methods and approaches With coverage from the eighteenth century to the present this book will be invaluable for teachers and students of string pedagogy and general readers who wish to learn more about string pedagogy s rich history diverse content and modern developments David Popper'S 'Hohe Schule' Etudes Benjamin Whitcomb, 2018-08-31 There are few works in the cello repertoire as significant as the etudes by David Popper They are practiced studied and learned by cellists all over the world as a sort of rite of passage to the advanced cello techniques This has been the case since their publication and there is no sign that this is going to change in the foreseeable future Auditions for such things as youth orchestras festivals competitions or university admissions frequently require the performance of one or more Popper etudes Learning these etudes is a wonderful way to prepare yourself for the advanced cello repertoire However tackling them on your own can be a daunting task Several authors have published their ideas and suggestions for practicing these etudes whether as articles books or videos What makes this guide different is that it shows you step by step exactly how you can effectively practice all the difficult spots in each etude such that you will surely learn and master each one at a faster rate than you would without these suggestions and exercises CelloMind Hans Jørgen Jensen, Minna Rose Chung, 2017-11-03 CelloMind is a two part pedagogical method book that focuses on intonation and left hand cello technique The coauthors of the book are Hans J rgen Jensen Professor of cello at the Bienen School of Music at Northwestern University and Minna Rose Chung Associate Professor of Cello at the Desautels Faculty of Music at the University of Manitoba Part I Intonation The mystery of intonation is revealed by defining and explaining the scientific principles that govern it To know and understand how to combine the three primary intonation systems has never before been expounded in a methodology publication and for good reason Playing with exquisite intonation has mostly been reserved for those who possess a strong intuitive sense however CelloMind breaks down this taboo using a systematic approach with a highly attuned manner The three systems of intonation that string players most commonly use today equal temperament just intonation and Pythagorean tuning are each explored and explained in great detail All chapters in the book include many practical samples and listening exercises that bridge the gap between the theory

and its application The chapters on intonation conclude with practical examples from the following repertoire Intonation Performance Practice in the Bach Solo Cello Suites and Intonation Performance Practice with Piano Part II Left Hand Technique The left hand technique chapters in this section complement the study of intonation by providing a solid foundation of skills for essential cello playing The topics and exercises have been selected to cover a wide range of technical skills that include playing with a light left hand touch speed coordination balanced vibrato agility finger independence and efficient shifting Original exercises developed for students over many years have also been incorporated into these chapters as well as studies from Julius Klengel Bernhard Cossmann Louis R Feuillard Jean Louis Duport Yakov Rosenthal and Fritz Albert Christian Rudinger
