Professional ASP.NET MVC 1.0 Rob Conery,Scott Hanselman,Phil Haack,Scott Guthrie,2009-07-01 This book begins with you working along as Scott Guthrie builds a complete ASP NET MVC reference application He begins NerdDinner by using the File New Project menu command within Visual Studio to create a new ASP NET MVC Application You ll then incrementally add functionality and features Along the way you ll cover how to create a database build a model layer with business rule validations implement listing details data browsing provide CRUD Create Update Delete data form entry support implement efficient data paging reuse UI using master pages and partials secure the application using authentication and authorization use AJAX to deliver dynamic updates and interactive map support and implement automated unit testing From there the bulk of the rest of the book begins with the basic concepts around the model view controller pattern including the little history and the state of the MVC on the web today We ll then go into the ways that MVC is different from ASP NET Web Forms We ll explore
