Rethinking Climate Change, Conflict and Security Jan Selby, Clemens Hoffmann, 2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of

Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of *Geopolitics* *Environmental Protection and Transitions from Conflict to Peace* Carsten Stahn, Jens Iverson, Jennifer S. Easterday, 2017-10-13 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Environmental protection is fundamental for the establishment of sustainable peace Applying traditional legal approaches to protection raises particular challenges during the transition from conflict to peace In the jus post bellum context protection of the environment and natural resources needs to be considered in tandem with a broad range of simultaneously applicable normative frameworks such as human rights transitional justice arms control disarmament UN law and practice development and domestic law While certain multilateral environment agreements such as the Convention Concerning the Protection of the World Cultural and Natural Heritage protect the environment international humanitarian law and international criminal law continue to treat environmental protection largely from an anthropocentric perspective This book is the first targeted work in the legal literature that investigates environmental challenges in the aftermath of conflict Addressing these challenges it brings together academics policy makers and practitioners from different disciplines to clarify policies and practices of environmental protection and key normative frameworks It draws on experiences and practices in post conflict settings to specify substantive principles and techniques to remedy and prevent harm *Routledge Handbook of Environmental Security* Richard A.
