Attribution Theory in the Organizational Sciences Mark J. Martinko, 2006-08-01 This book argues that conventional interpretations of Freudian psychology have not accounted for the existence and complexity of death anxiety and its intrinsic relation to the creation of illusions and delusions This book contends that there is sufficient evidence to support the view that death anxiety is not only a symptom of certain modes of psychopathology but is a very normal and central emotional threat human beings deal with only by impeding awareness of the threat from entering consciousness The immanence of the fear of death requires vigilant defensive and coping techniques especially the distortion of reality through these defenses and fantasies so that over whelming terror does not psychologically cripple the organism The fear of death is so horrific that human beings must insulate themselves in religious social and private illusions rituals obsessive pursuits self glorification and myriad desperate attempts to lie about the quintessential nature of reality Death is that terror that induces psychopathology This book demonstrates that a careful reading of Freud reveals a copious amount of material supporting these propositions

Managing Social and Ethical Issues in Organizations Stephen W. Gilliland, Dirk D. Steiner, Daniel P. Skarlicki, 2007-02-01 This volume provides up to date reviews of the research on a number of social and ethical issues of increasing concern confronting today's managers and organizations The authors who are recognized international experts on the topics they treat provide new theories and innovative perspectives on these issues Further they use a research base to identify ways for managers and human resources professionals to address these issues in their organizations Given its breadth of coverage practitioners faced with these

issues as well as researchers and graduate students in management and organizational psychology should find this volume of interest. This collection of ten chapters provides the cutting edge on a number of the most pressing challenges in management today. Readers of the volume will discover new models, innovative theoretical approaches, comprehensive reviews, theoretical and methodological critiques, and specific and insightful suggestions for research on these different social and ethical issues facing organizations. Perhaps more importantly, the practical suggestions that come from the research provide a useful bridge between what we know and what we can do to address these challenges and thus contribute even in a small way to workplaces that respect ethics and individuals in all their diversity. **The Oxford Handbook of Workplace**

Discrimination Adrienne J. Colella, Eden B. King, 2017-12-12. Increasing workplace diversity has given rise to growing intergroup challenges that persistently manifest in discrimination. An emerging science in psychology, sociology, and management has yielded useful evidence to be brought to bear on the important problem of discrimination, but current literature is either focused on social rather than work settings, on legal rather than interpersonal issues, or on the general phenomenon of diversity instead of the social problem of discrimination in action. Edited by Adrienne J. Colella and Eden B. King, *The Oxford Handbook of Workplace Discrimination* provides readers with a broad and interdisciplinary review of state-of-the-art research on discrimination in the workplace. In this volume, Colella, King, and their contributing authors tackle the unique experiences of people from diverse perspectives and communities, including religious minorities, gay and lesbian workers, and people with disabilities; the myriad of ways in which discrimination can manifest and its overall consequences; explanations for discrimination; and strategies for reduction. This Handbook will propel future scholarship by clearly outlining the substantive questions, methods, and issues for the future ahead.
