Arriaga, 2020-06-18 Interdependence theory is a powerful and applicable theory that has shaped the study of interpersonal relationships for decades providing foundational constructs and elucidating key assumptions within the burgeoning field of relationship science Research guided by interdependence theory sheds light on the diverse phenomena within ongoing relationships including the emergence of co operation trust dependence power and relationship maintenance At its core interdependence theory pinpoints key elements of daily interactions that predict specific experiences and outcomes that people have in different situations This handbook goes further to explain how interdependence theory continues to be used fruitfully in research driving our current understanding of relational processes We invite you to enter the world of interdependence and discover what top scholars across disciplines are discussing in their efforts to fully understand close intimate relationships

Agnew, 2014-10-09 How do we choose a partner to initiate a relationship with and what makes us stay in a given relationship over time These questions are most often pursued by scholars with an emphasis on the internal thoughts feelings and motivations of individual decision makers Conversely this volume highlights the importance of considering external influences on individual decision making in close relationships Featuring contributions from internationally renowned scholars the volume is divided into two interrelated sections The first section considers global and societal influences on romantic relationships and the second focuses on social network and communicative influences on romantic relationships Taken together this collection helps us to better understand how external factors influence the internal machinations of those involved in intimate relationships

Personality and Close Relationship Processes Stanley O. Gaines, Jr, 2016-08-18 Few observers of relationship dynamics would dispute the claim of interdependence theorists that a defining feature of close relationships is the extent to which partners influence each other s thoughts feelings or behaviors However partners do not behave simply in response to each other s behavior both partners in a given relationship bring themselves indeed their selves into the relationship as well Not only are individuals selves enormously complex and rich in content but so too are the multitude of personality characteristics including traits values attitudes motives and emotions that contribute to selves richness Gaines Jr provides a major integration of research on personality with research on relationship science and demonstrates how

personality constructs can be readily incorporated into the two most influential theories of close relationships attachment theory and interdependence theory This study will be of value to scholars in the fields of close relationships personality psychology communication studies and family studies
