

# attwood® Anchor Rein

## 1025A Mounting Instructions

Attwood marine hardware, navigation lighting, interior lighting, bilge pumps, and other marine accessories are specified more than any other brand by America's best-known boat manufacturers as original equipment. Look to Attwood for quality replacement parts and add-on marine accessories.

### SAVE THESE INSTRUCTIONS

Form Number 69195 Rev. D

03-10

### FEATURES:

The Attwood Anchor Rein gives immediate access to 32' of nylon rope, neatly spooled, on a spring-loaded reel. It is ideal for an anchor rope, tying up slips, docks and pilings, or for use as a tie down. There are many more uses to which the Anchor Rein can be put.

A non-abrasive, non-cutting lock device secures rope at desired length by simply tightening the handle.

Housing made of tough plastic, with ZAMAK handle and stainless steel ring to insure against rust and corrosion.

### ⚠ WARNING:

**DO NOT REMOVE THE SCREW WHICH SECURES THE TWO PLASTIC HOUSINGS TOGETHER. DO NOT ATTEMPT TO SERVICE THE SPRING LOADED REEL INSIDE THE PLASTIC HOUSINGS. THE SPRING IS A COILED PIECE OF METAL AND CAN CAUSE INJURY IF IT IS RELEASED FROM THE SPRING HOLDER.**

### TOOLS REQUIRED:

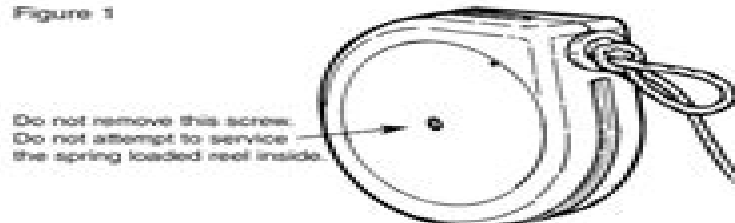

1. Drill and drill bits
2. 3/4" wrench
3. Round rasp (if needed)

### INSTALLATION INSTRUCTIONS:

**NOTE:** Before you drill a hole in your boat, BE ABSOLUTELY CERTAIN there is room for the unit beneath the deck or gunwale where it can be installed flush against the bottom side of the deck of gunwale without the sides of the spool assembly being jammed against the side of the boat. Jamming the covers against the sides will distort the covers, binding them against the spool. This will restrict the action of the spring and the return of the rope into the handle. If after installation the rope does not snap back and return fully into the handle, the following corrective steps should be taken. **Disassemble all top hardware EXCEPT the bead/D-ring assembly.** Bring unit out where you can comfortably work on it. Follow instruction 2. Now, remove cap, screw, bead/D-ring assembly from top of rope and withdraw rope down through the top hardware and 1/2" drilled hole. Take a 1/2" drill, or round rasp, and enlarge the hole opposite from the direction it is binding. You can enlarge the hole as much as 1/2" and still have enough washer to cover the hole. This will not impair the use or function of the unit.

1. Drill a 1/2" hole at the position selected for the installation of your unit. Determine the thickness of the hull or mounting surface. **NOTE:** Thickness of mounting surface can not exceed 1".
2. Grasp the knot and pull out 4 feet of rope. Double the rope and tie simple overhand knot in the rope next to the gasket (see figure 1). Allow the spring tension to pull this knot against the gasket. This will secure the rope and give you slack to work with, without spring tension.

### 3. From packaging remove:

- |                      |                            |
|----------------------|----------------------------|
| No. 9 Sealing Washer | No. 3 Bead/D-ring assembly |
| No. 8 Collar         | No. 1 Cap                  |
| No. 7 Brake          | No. 2 Screw                |
| No. 6 Pusher         | No. 10 Spacer (rubber)     |
| No. 5 Handle         | No. 11 Spacer (plastic)    |

Figure 2

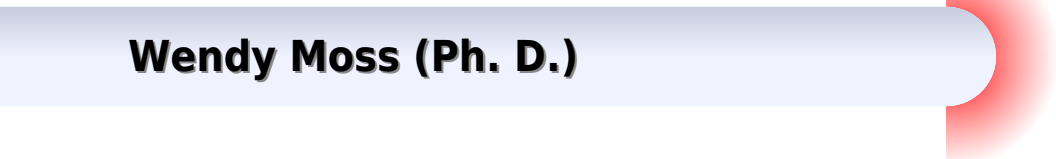

### 4. Select a suitable spacer as follows:

- Deck thickness up to 3/8"; use No. 11 plastic spacer
- Deck thickness 3/8" to 7/8"; use No. 10 rubber spacer
- Deck thickness 7/8" to 1"; make or buy a hard spacer 3/32" thick. 1/2" washers can be used.

5. Untie the knot at the free end of the rope and thread it through the spacer selected above and through the hole (from the reel side) drilled in step 1. Pull enough rope through so that you can comfortably proceed with the next step.
6. Take loose end of the nylon rope, roll it in your fingers to help make a point and thread it through items 9, 8, 7, 6, 5, 3 (in that order), see figure 3. **NOTE:** On item No. 6, be certain the rope is inserted into the bottom or flat side. This is important as this flat side acts as a push plug against the brake. The top side is beveled to allow the rope smooth and easy entry back into the spool. Also, be certain to insert the rope end into the small hole (bottom side) of the bead/D-ring assembly. Pull two or three inches of rope through the bead/D-ring assembly so you can work it in.
7. Take the end of the rope you have pulled through the bead/D-ring assembly, hold and roll the very end between your fingers to make it firm. Take a nail or awl and push down into the center of the rope to make a pilot hole. Install the screw into the end of the rope until it is flush. **NOTE:** Be very careful and particular as the flat head screw needs to be centered where it will flare the rope top, creating a tight wedge inside the bead/D-ring assembly. Take the cap (item No. 1), place squarely on top of bead and snap in. Be sure cap edges are down flush against the bead.
8. Untie the overhand knot resting against the gasket. Holding the unit in your hand, allow the spring tension to bring it to the underneath side of the hole drilled in the boat. With the gasket placed squarely against the boat and the threaded hole centered, from the top side, screw the collar through the hole into the unit. You may turn the unit in any direction that will fit into your boat. Just be certain the gasket fits flush against the boat so it will line up with the collar threads. (**NOTE:** Do not crosstread these two pieces.) You should be able to hand screw the collar into the unit for several turns until it is
