Applying Career Development Theory Counseling:

Applying Career Development Theory to Counseling Richard S. Sharf, 2002 Book is divided into an introduction and four parts: trait and type theories, life span theory, special focus theories, and theoretical integration. Trait and type theories emphasize the assessment of interests, abilities, achievements, personality, and values along with the acquisition of occupational information. Life span theory follows a chronological approach, studying people across four broad stages in the life span. Special focus theories include the application to career development issues of research in psychology such as constructivist theory and learning theory. Part three also includes contributions from sociology and economics. Part four deals with how these theories can be combined for effective career counseling. The last chapter, Chapter 16, also discusses the relevance of career development theories to special issues such as noncounseling interventions, group counseling, and job placement among other concerns. This fourth edition of the book represents a milestone in the history of the Systems Theory Framework of career development that attests to its continuing influence and contemporary relevance. It emphasizes changes in career development theory, practice, and research since its first edition in 1999. At that time, the publication of the STF was described by reviewers as a groundbreaking departure from traditional counseling texts, a landmark work leading to the convergence of career development theories, and as a rare book that not only illuminates a field of study but also advances it. Subsequent commentary attests to the strength of the metatheoretical contribution of the STF and its facilitation of links between theory, research, and practice. This book introduces systems theory and the STF and comprehensively overviews traditional and contemporary career theory and analyses it through the metatheoretical lens of the STF. It then describes applications of the STF by applying systems thinking, systems mapping, and experiential learning. Finally, the contributions and future directions of the STF are highlighted. This book provides a record of almost 30 years of contribution of the STF to career theory.
