Sustainable Planet Barbara J. McNicol, 2021-04-26 Sustainable Planet is a two volume resource that provides comprehensive coverage on the world s most pressing environmental issues their impact in countries around the world and how or if they are being addressed Sustainable Planet Issues and Solutions for Our Environment s Future examines contemporary challenges to sustainability including population climate change decreasing biodiversity land degradation and water quality Each chapter analyzes one of these challenges by first providing an introduction to the topic as well as key concepts to provide readers with a basic understanding of the issue Essays deepen comprehension by investigating different aspects of the challenge Case studies written by experts in the field follow Each case study considers how a specific country is affected by the particular issue as well as the measures the country is taking to

find solutions that will provide for a more sustainable future The final chapter of the book explores sustainability at a global level by examining through annotated primary documents a number of multinational initiatives and alliances intended to create a more sustainable planet Modern Agriculture and the Environment David Rosen,E. Tel-Or,Y. Hadar,Y.

Chen,2012-12-06 This volume comprises the proceedings of the First International Rehovot Conference on Modern Agriculture and the Environment held at the Rehovot Campus of the Faculty of Agriculture the Hebrew University of Jerusalem Israel 26 October 1994 The conference first in a series intended to be convened in Rehovot at 4-5 year intervals to address various aspects of the interaction of agriculture and the environment was initiated organised and carried out under the auspices of the Faculty of Agriculture the leading academic institution in agricultural and environmental studies in Israel It featured four keynote addresses 39 invited lectures 40 submitted papers and 62 posters Of these 51 articles written by 122 contributing authors from 14 countries were selected by the editors to be presented in this book All through the twentieth century and especially ever since the advent of the Green Revolution modern agriculture has been striving to feed and clothe the ever increasing multitudes of the human species through improved technology relying heavily on tremendous inputs of fertilisers pesticides and various other agrochemicals Undoubtedly this has been a great blessing to mankind and enormous strides have indeed been made in the never ending struggle against starvation but these have been achieved at a very steep price of increased environmental deterioration In fact modern agriculture has become one of the major factors contributing to the degradation of the world's fragile biosphere **Advanced Technology for the Conversion of Waste into Fuels**

and Chemicals Anish Khan,Mohammad Jawaid,Antonio Pizzi,Naved Azum,Abdullah M. Asiri,Ilyas M.D. Isa,2021-07-26 Advanced Technology for the Conversion of Waste into Fuels and Chemicals Volume 2 Chemical Processes is the second of two volumes by the editors the first volume is Advanced Technology for the Conversion of Waste into Fuels and Chemicals Biological Processes This volume presents advanced techniques and combined techniques used to convert energy to waste including combustion gasification pyrolysis anaerobic digestion and fermentation The title focuses on solid waste conversion to fuel and energy presenting advances in the design manufacture and application of conversion technologies Contributors from physics chemistry metallurgy engineering and manufacturing present a truly trans disciplinary picture of waste to energy conversion Huge volumes of solid waste are produced globally while at the same time huge amounts of energy are produced from fossil fuels Waste to energy WTE technologies are developing rapidly holding out the potential to make clean sustainable power from waste material These WTE procedures incorporate various methods and blended approaches and present an enormous opportunity for clean sustainable energy Presents the latest advances in waste to energy techniques for converting solid waste to valuable fuel and energy Brings together contributors from physics chemistry metallurgy engineering and the manufacturing industry Includes advanced techniques such as combustion gasification pyrolysis anaerobic digestion and fermentation Goes far beyond municipal waste including the recouping of valuable energy from a

variety of industrial waste materials *Fish Diseases* Galina Jeney, 2017-02-11 *Fish Diseases Prevention and Control Strategies* provides essential information on disease prevention and treatment by the most experienced fish culturists in the industry. The book presents both traditional and novel methodologies of identifying and addressing fish disease risk along with preventative and responsive insights to the challenges impacting fish production today. Both specific vaccination and non-specific immunostimulation approaches are explored from maintaining optimal environmental conditions to understanding how stressors in fish affect their immune system. Includes relevant information on government restrictions on drug usage in aquaculture to address the strict demand for fish products free of pollutants/antibiotics. Presents best practices in fish farming to prevent disease and promote good health status and fish disease management. Provides the most recent research on fish diseases prevention, the pathogens most studied, and options for methods of treatment. **Freshwater Fish** Heimo Mikkola, 2024-11-27 There are at least 14 350 freshwater fish species in the world living in lakes and rivers with a salinity level of less than 1.05%. In 2021 it was estimated that one third of the global freshwater fish species are at risk of extinction. Therefore conservation issues are crucial as is the decision whether to allow alien species to improve the production or instead concentrate on the well-being of the native species. At the same time it is necessary to remember that as food fish are an important human resource. In this book we have chapters presenting the fish species from Africa, Europe and North and South America. Therefore we have cold water, cool water and warm water species. Stock assessments are critical in developing management plans for specific lakes and regions. Citizen science apps are a necessary tool for helping fisheries management biologists and researchers. *Application of Microbial Technology in Wastewater Treatment and Bioenergy Recovery* Shaon Ray Chaudhuri, 2024-11-29 This book explores microbial intervention in wastewater treatment for resource recovery, bioenergy production and environmental sustainability. It discusses the fate of pollutants, challenges in existing treatment strategies and the need for innovation. Case studies illustrate wastewater-specific treatment strategies for bioenergy and resource recovery at different scales. The book emphasizes the use of wastewater for resource recovery through sequestration or biotransformation and highlights tailor-made consortium development for sludge-free treatment. It also covers sustainable approaches like microbial biofilm reactors, microbial fuel cells and membrane technology for wastewater treatment. It also deals with nanotechnology in combination with microbial technology for handling refractory components in wastewater that could not be handled by microbes alone. This book provides insights into microbial technology for a clean environment and bioenergy production through a reduce-recover-and-reuse approach. This valuable resource offers practical information that can be applied by engineers, researchers and undergraduate and graduate students as well as business professionals in the bioenergy field, aiding them in the implementation of renewable energy projects. *Case Studies in Ecohealth* Susan C. Cork, Douglas P. Whiteside, 2024-04-12 *Case Studies in Ecohealth* is primarily intended to be a student textbook using a series of case studies to illustrate key concepts applicable to EcoHealth with a focus on taking an

interdisciplinary approach to solving complex problems at the interface between animals and their environment Using case studies the book will illustrate key concepts in EcoHealth allowing readers to better understand the strengths and challenges of taking an Eco Health approach Within the key themes addressed in the book the reader will gain insight into how to approach complex problems at the animal environment interface using a transdisciplinary approach Access to the case studies presented in the book along with supplementary material on line will provide the reader with good examples of current and emerging issues for discussion in the class room or for field experience programs 5m Books
