Attribution Theory Social And Functional Extensions:

Attribution Theory Miles Hewstone, 1983 Life-span Perspectives and Social Psychology R. P. Abeles, 2014-02-25 First published in 1987 There is a wide gap between life span research and mainstream social psychology and this book strikes a bright spark between these poles promising as a corrective to narrowness and sterility The chapters reflect a wide variety of approaches in social psychology as well as considerable breadth in the range of ideas from life span human development that are brought to bear **Advances in Experimental Social Psychology**, 2011-08-03 Advances in Experimental Social Psychology continues to be one of the most sought after and most often cited series in this field Containing contributions of major empirical and theoretical interest this series represents the best and the brightest in new research theory and practice in social psychology This serial is part of the Social Sciences package on ScienceDirect Visit info.sciencedirect.com for more information Advances Experimental Social Psychology is available online on ScienceDirect full text online of volume 32 onward Elsevier book series on ScienceDirect gives multiple users throughout an institution simultaneous online access to an important complement to primary research Digital delivery ensures users reliable 24 hour access to the latest peer reviewed content The Elsevier book series are compiled and written by the most highly regarded authors in their fields and are selected from across the globe using Elsevier's extensive researcher network For more information about the Elsevier Book Series on ScienceDirect Program please visit info.sciencedirect.com/bookseries One of the most sought after and most often cited series in this field Contains contributions of major empirical and theoretical interest This series represents the best and the brightest in new research theory and practice in social psychology The Understanding of Causation and the Production of Action Peter Anthony White, 2018-10-24 This text is an attempt to trace out a line of development in the understanding of how things happen from origins in infancy to mature forms in adulthood There are two distinct but related ways in which people understand things as happening denoted by the terms causation and action This book is concerned with both The central claim and organizing principle of the book is that by the end of the second year of life children have differentiated two core theories of how things happen These theories deal with causation and action The two theories have a common point of origin in the infant's experience of producing actions but thereafter diverge both in content and in realm of application Once established the core theories of causation and action never change but form a permanent metaphysical underpinning on which subsequent developments in the understanding of how things happen are erected The story of development is therefore largely the story of how further concepts become attached to integrated with the core theories Although the developmental and adult literatures on causal understanding appear at first glance to have little in common in fact this appearance is illusory and the idea of two theories helps to bring the two literatures in contact with each other The book begins with a survey of the main philosophical ideas about causation and action Following this the possible origins of understanding in infancy are reviewed and separate chapters then deal with the development of understanding of action and

causation through childhood This is then linked to the adult understanding of action and causation and the literature on adult causal attribution and causal judgement is reviewed from this perspective

Exploring Communication Theory Kory Floyd, Paul Schrodt, Larry A. Erbert, Kristina M. Scharp, 2022-06-13 Continuing its engaging and readable approach this second edition presents an overview of the major theories within the discipline of communication studies inclusive of the three major paradigms of social scientific interpretive and critical Each member of the author team writes from his or her area of expertise giving readers further insight into how the theory is applied to research within communication studies With extensive pedagogical features the text underscores key concepts and links them to students own communication studies scholarship and everyday lives Key updates for this edition include updated examples and discussions around theories to give students a deeper understanding explorations of Black Lives Matter and intersectionality and new pedagogical features in line with Bloom s taxonomy This book is ideal as a core text for undergraduate courses in communication theory Online resources also accompany the text an instructor manual test bank lecture slides and author introduction videos Please visit www.routledge.com/9781032015194 to access the materials

The Development of Social Cognition John B. Pryor, Jeanne D. Day, 2012-12-06 One of the more promising recent developments in the study of social cognition has been the cross pollination of ideas from the fields of developmental and social psychology Many social psychologists have come to the conclusion that a complete account of social cognitive phenomena must include not l 1ly detailed analyses of those processes in their adult form but also an understanding of their origins and development in children Likewise in the last ten years psychologists involved in social developmental research have shown an increasing interest in theories and research generated in the adult social cognition literature Surely among the more important cognitive phenomena to be studied in social development are those that are related to psychological processes in later life This approaching integration of adult and developmental social psychology is long overdue and promises benefits to research in both disciplines The goal of this volume is to move the fields toward this synthesis For this reason we have put together a collection of original essays by authors who are among the more prominent new researchers in this movement In selecting topics we have tried to cover areas of recent social cognition research that are of interest to both developmental and adult social psychologists This volume is divided into three general sections 1 Attribution and Social Judgment 2 Moral Development and a Sense of Self and 3 Social Influences on Cognitive Development

Myth of Addiction John Booth Davies, 2013-12-02 First published in 1998 This study explains addiction in terms of social psychological processes looks at the fundamental nature of addiction and its causes pharmacology attribution and volitional theories as well as a context for drug problems

Social Identifications Dominic Abrams, Michael A. Hogg, 2006-06-07 The authors of Social Identifications set out to make accessible to students of social psychology the social identity approach developed by Henri Tajfel John Turner and their colleagues in

Bristol during the 1970s and 1980s Michael Hogg and Dominic Abrams give a comprehensive and readable account of social identity theory as well as setting it in the context of other approaches and perspectives in the psychology of intergroup relations They look at the way people derive their identity from the social groups to which they belong and the consequences for their feelings thoughts and behaviour of psychologically belonging to a group They go on to examine the relationship between the individual and society in the context of a discussion of discrimination stereotyping and intergroup relations conformity and social influence cohesiveness and intragroup solidarity language and ethnic group relations and collective behaviour Social Identifications fills a gap in the literature available to students of social psychology The authors presentation of social identity theory in a complete and integrated form and the extensive references and suggestions for further reading they provide will make this an essential source book for social psychologists and other social scientists looking at group behaviour

Social Psychology Jane Callaghan, Lisa Lazard, 2011-08-01 This introductory social psychology text addresses the core knowledge domains of the subject with key chapters on understanding identities attribution theory attitudinal research social influence racism and prejudice class and exclusions methodologies of social psychology and discursive psychology It provides concise and focused coverage of the central concepts research and debates in this key area while developing students higher level skills Activities help readers build the underpinning generic critical thinking and transferable skills they need in order to become independent learners and to meet the relevant requirements of their programme of study
