An Introduction to Information Science Roger Flynn, 2020-10-02 This book comprises an introduction to information as an external commodity a data base that can be manipulated retrieved transmitted and used. It is useful at an introductory undergraduate level and also for anyone who is new to the field of Information Science.

A Survey of Data Leakage Detection and Prevention Solutions Asaf Shabtai, Yuval Elovici, Lior Rokach, 2012-03-15 SpringerBriefs present concise summaries of cutting edge research and practical applications across a wide spectrum of fields. Featuring compact volumes of 50 to 100 pages approximately 20 000 40 000 words the series covers a range of content from professional to academic. Briefs allow authors to present their ideas and readers to absorb them with minimal time investment. As part of Springer's eBook collection SpringerBriefs are published to millions of users worldwide. Information Data Leakage poses a serious threat to companies and organizations as the number of leakage incidents and the cost they inflict continues to increase. Whether caused by malicious intent or an inadvertent mistake data loss can diminish a company's brand reduce shareholder value and damage the company's goodwill and reputation. This book aims to provide a structural and comprehensive overview of the practical solutions and current research in the DLP domain. This is the first comprehensive book that is dedicated entirely to the field of data leakage and covers all important challenges and techniques to mitigate them. Its informative factual pages will provide researchers students and practitioners in the industry with a comprehensive yet concise and convenient reference source to this fascinating field. We have grouped existing solutions into different categories based on a described taxonomy. The presented taxonomy characterizes DLP solutions according to various aspects such as leakage source data state leakage channel deployment scheme preventive detective approaches and the action upon leakage. In the commercial part we review solutions of the leading DLP market players based on professional research reports and material obtained from the websites of the vendors. In the academic part we cluster the academic work according to the nature of the leakage and protection into various categories. Finally we describe main data leakage scenarios and present for each scenario the most relevant and applicable solution or approach that will mitigate and reduce the likelihood and or impact of the leakage scenario.

Experiment and Evaluation in Information Retrieval Models K. Latha, 2017-07-28 Experiment and Evaluation in Information Retrieval Models explores different algorithms for the application of evolutionary computation to the field of information retrieval IR. As well as examining existing approaches to resolving some of the problems in this field results obtained by researchers are critically

evaluated in order to give readers a clear view of the topic In addition this book covers Algorithmic Solutions to the Problems in Advanced IR Concepts including Feature Selection for Document Ranking web page classification and recommendation Facet Generation for Document Retrieval Duplication Detection and seeker satisfaction in question answering community Portals Written with students and researchers in the field on information retrieval in mind this book is also a useful tool for researchers in the natural and social sciences interested in the latest developments in the fast moving subject area Key features Focusing on recent topics in Information Retrieval research Experiment and Evaluation in Information Retrieval Models explores the following topics in detail Searching in social media Using semantic annotations Ranking documents based on Facets Evaluating IR systems offline and online The role of evolutionary computation in IR Document and term clustering Image retrieval Design of user profiles for IR Web page classification and recommendation Relevance feedback approach for Document and image retrieval

Introduction to Information Retrieval Christopher D. Manning,Prabhakar Raghavan,Hinrich Schütze,2008-07-07 Class tested and coherent this textbook teaches classical and web information retrieval including web search and the related areas of text classification and text clustering from basic concepts It gives an up to date treatment of all aspects of the design and implementation of systems for gathering indexing and searching documents methods for evaluating systems and an introduction to the use of machine learning methods on text collections All the important ideas are explained using examples and figures making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science Based on feedback from extensive classroom experience the book has been carefully structured in order to make teaching more natural and effective Slides and additional exercises with solutions for lecturers are also available through the book s supporting website to help course instructors prepare their lectures

Solutions Manual to accompany An Introduction to Numerical Methods and Analysis James F. Epperson,2021-09-03 A solutions manual to accompany An Introduction to Numerical Methods and Analysis Third Edition An Introduction to Numerical Methods and Analysis helps students gain a solid understanding of a wide range of numerical approximation methods for solving problems of mathematical analysis Designed for entry level courses on the subject this popular textbook maximizes teaching flexibility by first covering basic topics before gradually moving to more advanced material in each chapter and section Throughout the text students are provided clear and accessible guidance on a wide range of numerical methods and analysis techniques including root finding numerical integration interpolation solution of systems of equations and many others This fully revised third edition contains new sections on higher order difference methods the bisection and inertia method for computing eigenvalues of a symmetric matrix a completely re written section on different methods for Poisson equations and spectral methods for higher dimensional problems New problem sets ranging in difficulty from simple computations to challenging derivations and proofs are complemented by computer programming exercises illustrative examples and sample code This acclaimed textbook Explains how to both construct and evaluate

approximations for accuracy and performance Covers both elementary concepts and tools and higher level methods and solutions Features new and updated material reflecting new trends and applications in the field Contains an introduction to key concepts a calculus review an updated primer on computer arithmetic a brief history of scientific computing a survey of computer languages and software and a revised literature review Includes an appendix of proofs of selected theorems and author hosted companion website with additional exercises application models and supplemental resources Innovative

Security Solutions for Information Technology and Communications Mark Manulis,Diana Maimuț,George Teșeleanu,2024-01-20 This book constitutes revised selected papers from the thoroughly refereed conference proceedings of the 16th International Conference on Innovative Security Solutions for Information Technology and Communications SecITC 2023 held in Bucharest Romania in November 2023 The 14 full papers included in the book were carefully reviewed and selected from 57 submissions They focus on all theoretical and practical aspects related to information technology and communications security *Rising Threats in Expert Applications and Solutions* Vijay Singh Rathore,Nilanjan Dey,Vincenzo Piuri,Rosalina Babo,Zdzislaw Polkowski,João Manuel R. S. Tavares,2020-10-01 This book presents high quality peer reviewed papers from the FICR International Conference on Rising Threats in Expert Applications and Solutions 2020 held at IIS University Jaipur Rajasthan India on January 17 19 2020 Featuring innovative ideas from researchers academics industry professionals and students the book covers a variety of topics including expert applications and artificial intelligence machine learning advanced web technologies like IoT big data and cloud computing in expert applications information and cybersecurity threats and solutions multimedia applications in forensics security and intelligence advances in app development management practices for expert applications and social and ethical aspects of expert applications in applied sciences E-Business Managerial Aspects, Solutions and Case Studies Cruz-Cunha, Maria Manuela,Varajão, João,2010-12-31 This book provides a discussion of the managerial aspects solutions and case studies related to e business disseminating current achievements and practical solutions and applications Provided by publisher Methods and Applications for Advancing Distance Education Technologies: International Issues and Solutions Syed, Mahbubur Rahman,2009-04-30 Provides communication technologies intelligent technologies and quality educational pedagogy for advancing distance education for both teaching and learning
