Applied Studies In Climate Adaptation:

Applied Studies in Climate Adaptation Jean P. Palutikof, Sarah L. Boulter, Jon Barnett, David Rissik, 2014-12-31 The book advances knowledge about climate change adaptation practices through a series of case studies. It presents important evidence about adaptation practices in agriculture, businesses, the coastal zone, community services, disaster management, ecosystems, indigenous populations and settlements, and infrastructure. In addition to 38 case studies across these sectors, the book contains horizon scoping essays from international experts in adaptation research, including Hallie Eakin, Susanne Moser, Jonathon Overpeck, Bill Solecki, and Gary Yohe. Australia's social ecological systems have a long history of adapting to climate variability and change, and in recent decades has been a world leader in implementing and researching adaptation, making this book of universal relevance to all those working to adapt our environment and societies to climate change.

Legal Geography Tayanah O'Donnell, Daniel F. Robinson, Josephine Gillespie, 2019-12-06 This book is the first legal geography book to explicitly engage in method. It complements this by also bringing together different perspectives on the emerging school of legal geography. It explores human environment interactions and showcases distinct environmental legal geography scholarship. *Legal Geography: Perspectives and Methods* is an innovative book concerned with a new relational and material way of examining our legal spatial world. With chapters examining natural resource management, Indigenous knowledge and political ecology scholarship, the text introduces legal geography's modes of analysis and critique. The book explores topics such as Indigenous environmental rights, the impacts of extractive industries, mediation of climate change, food, animal and plant patents, fossil fuels, mining, and coastal environments, based on empirical, jurisdictional, and methodological insights from Australia, New Zealand, and the Asia Pacific to demonstrate how space and place are invoked in legal processes and contestations and the methods that may be employed to explore these processes and contestations. This book examines the role of legal geographies in the 21st century beyond the simple law in action, and it will thus appeal to students of socio-legal studies, human geography, environmental studies, environmental policy, as well as politics and international relations.
