Trends in Applied Intelligent Systems Nicolás García-Pedrajas, Francisco Herrera, Colin Fyfe, José Manuel Benítez Sánchez, Moonis Ali, 2011-01-22 Annotation The three volume set LNAI 6096 LNAI 6097 and LNAI 6098 constitutes the thoroughly refereed conference proceedings of the 23rd International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems IEA AIE 2010 held in Cordoba Spain in June 2010 The total of 119 papers selected for the proceedings were carefully reviewed and selected from 297 submissions

Advanced Technologies Applied to Training Design Robert J. Seidel, Paul R. Chatelier, 2012-12-06 This collection of papers is the result of a workshop sponsored by NATO's Defense Research Group Panel 8 in the Fall of 1991 The workshop is the second of a series the first of which was held in the Spring of 1985 As you study these papers recall that this workshop occurred during the time that many changes were occurring in Eastern Europe and world wide The need to identify training technologies for maintaining a capable and ready force during times of decreases in military force structure was and is currently our challenge The opportunities for these technologies to provide a service and opportunity for nonmilitary usage is our future Therefore this workshop maintained its focus on technology and application regardless of the user These and other statements made herein are personal and reflect the opinions of the author's and in no way represent the official position or policy of our individual governments

v PREFACE The truly international contributions to this book reinforced our belief that training technology must be collaborative and data widely shared to strengthen our future We want to thank the authors of these papers for their abilities to see beyond the near horizon Their contributions and the support of the organizations that sponsored their work is greatly appreciated We also gratefully recognize the contributions of all who attended the workshop

Applied Ontology Engineering in Cloud Services, Networks and Management Systems J. MARTIN SERRANO, 2012-03-08 Metadata standards in today's ICT sector are proliferating at unprecedented levels while automated

information management systems collect and process exponentially increasing quantities of data With interoperability and knowledge exchange identified as a core challenge in the sector this book examines the role ontology engineering can play in providing solutions to the problems of information interoperability and linked data At the same time as introducing basic concepts of ontology engineering the book discusses methodological approaches to formal representation of data and information models thus facilitating information interoperability between heterogeneous complex and distributed communication systems In doing so the text advocates the advantages of using ontology engineering in telecommunications systems In addition it offers a wealth of guidance and best practice techniques for instances in which ontology engineering is applied in cloud services computer networks and management systems Engineering and computer science professionals infrastructure architects software developers service designers infrastructure operators engineers etc are today confronted as never before with the challenge of convergence in software solutions and technology This book will help them respond creatively to what is sure to be a period of rapid development
