

Applications of Implementation Science to Early Care and Education Programs and Systems

Implications for Research, Policy, and Practice

Tamara Halle, Martha Zaslow, Inelise Martinez-Beck, and Allison Metz

This book marks and seeks to advance an important conceptual shift in early childhood research, policy, and practice. Its authors acknowledge that all of the strenuous work involved in developing and conducting rigorous evaluations of programs to strengthen early childhood development—even though it is a substantial accomplishment that we now have a body of work through such efforts identifying evidence-based practices for early childhood—is not enough. There is growing recognition that programs not only need to be demonstrated as effective in carefully controlled circumstances—or even in less controlled community settings—but also need careful preparation to plan for and assure replicability, need to assure that there will be structures and practices in place to allow for sustainability, and even early in program planning and development, need to prepare for expansion in order to be worthy of full investment by policy and in practice.

While there is growing acknowledgment of the need for such a focus on implementation—and there is a body of work summarizing the literature and providing a framework for implementation science as it might be applied to early childhood—we are at an early stage in terms of application of this work within early childhood research, policy, and practice. Though it is clear that early childhood implementation science should involve taking steps to plan for and support fidelity of implementation, sustainability, and expansion, it is much less clear at this point what measures and methods should be used to document that these steps are being taken appropriately. Furthermore, we are only at the beginning of applying implementation science within early childhood systems.

The chapters prepared for this book draw together the most advanced work in this area, seeking to apply implementation science to the early childhood field and focusing on the development of methods and measures for application of these frameworks. Because implementation science is of importance to researchers, practitioners, and policy makers, this book has been written with these multiple
