Techno-Nationalism Alex Capri, 2024-10-04 The essential book on technology related competition between nations and its impact on the world Nations have long sought to use technology as a power multiplier for their own ambitions In the twenty first century at a time of unprecedented innovation the United States and China are in a race to achieve technological superiority But how will this affect long standing trade ties and the international landscape Techno nationalism holds that a nation's economic strength and its national security even its social stability are linked to the technological prowess of its institutions and enterprises From artificial intelligence and biotechnology to semiconductors and quantum science nations that fall behind in the technology race risk becoming permanent losers with potentially catastrophic consequences After decades of trade liberalization and free flowing investment into China a paradigm shift amongst a bloc of like minded mostly Western countries has set in motion epic change Techno nationalism is reorganizing the global economy Alex Capri who spent decades as a trade and supply chain professional in China and throughout the world lays out the dynamics of this change and its underlying themes from the paradox facing U S China commercial linkages to the grey zones in which states and firms must now try to coexist He provides a realist's perspective of both the challenges and opportunities facing international actors Regarding the elements of techno nationalism Capri paints a masterful picture of the strategic decoupling of supply chains and the re shoring of key manufacturing ecosystems such as semiconductors He provides an illuminating account of the geopolitics of data and the fragmentation of the digital landscape as well as the bifurcation of financial markets academia and R D around Chinese and American spheres of influence These themes carry through to Capri's fascinating accounts of the modern day space race and
