An Introduction To Theories Of Personality 8th Edition:

An Introduction to Theories of Learning Matthew H. Olson, Julio J. Ramirez, 2020-02-07 Since its first edition An Introduction to Theories of Learning has provided a uniquely sweeping review of the major learning theories from the 20th century that profoundly influenced the field of psychology. In this tenth edition the authors present further experimental evidence that tests many of the fundamental ideas presented in these classic theories as well as explore many of the advances in psychological science and neuroscience that have yielded greater insight into the processes that underlie learning in human beings and animals. The four main goals of this text are to define learning and to show how the learning process is studied. Chapters 1 and 2 place learning theory in historical perspective. Chapter 3 and to present essential features of the major theories of learning with implications for educational practices. Chapters 4 through 16. The authors retained the best features of earlier editions while making revisions that reflect current research and scholarship including coverage of active learning and the testing effect, information for problem solving in ravens, data illustrating the neurobiological basis of the cognitive map and spatial learning, new research on brain plasticity and its role in learning as well as the impact of poverty on brain and cognitive development and new evidence that challenges the notion of learning styles. Complete with chapter summaries, discussion questions and a glossary, this text is essential reading for theories of learning and applied cognitive psychology courses. See Support Material below for new online resources. Instructor resources include PowerPoint slides and a testbank containing over 500 questions in both Microsoft Word and GIFT file formats. Student resources include chapter summaries, discussion questions and a glossary of key terms.

Beneath the Mask Robert N. Sollod, Christopher F. Monte, 2008-01-22 Beneath the Mask presents classic theories of human nature much as each theorist might if the theorist were to teach his or her ideas to people encountering them for the first time. Through a theorist by theorist approach, this Eighth Edition continues to explore the ideas of personality theorists developmentally, incorporating the personal origins of ideas to illuminate links between the psychology of each theorist and that theorist's own psychology of persons. Beneath the Mask presents the sequence of thinking for more than 20 theorists and demonstrates how the thinking that led to major theories is nested in the life experience of the theorists within the context of the surrounding culture. The authors emphasize each theorist's life history as the basis for the ideas that constitute his or her theories, making them easier to understand as pictures of human nature. John P. Wilson has revised the text in a manner that preserves and improves upon the best features of the late Robert N. Sollod and Christopher Monte's work.
