**Universal Science: An Introduction to Islamic Metaphysics** Mahdī Ḥā'irī Yazdī, 2017-04-03 The Universal Science Ilm i kull by Mahd ir Yazd is a concise but authoritative outline of the fundamental discussions in Islamic metaphysics For many years used as a textbook in Iran this short text offers English readers a readily accessible lucid and yet deeply learned guide through the Sadrian Avicennan and Illuminationist schools of thought whilst also demonstrating how the living tradition of Sh philosophy engages with central ontological epistemological aetiological and psychological questions Discussions include the primacy of existence the proper classifications of quiddity and the manifold properties of causality and causal explanation This is the first of the various influential works authored by this leading Sh ah intellectual to have been translated into English from the original Persian

**The Logic of Mind** R.J. Nelson, 2012-12-06 This book presents a mechanist philosophy of mind I hold that the human mind is a system of computational or recursive rules that are embodied in the nervous system that the material presence of these rules accounts for perception conception speech belief desire intentional acts and other forms of intelligence In this edition I have retained the whole of the first edition except for discussion of issues which no longer are relevant in philosophy of mind and cognitive psychology Earlier reference to disputes of the 1960 s and 70 s between hard line empiricists and neorationalists over the psychological status of grammars and language acquisition for instance has simply been dropped In place of such material I have entered some timely or new topics and a few changes There are brief references to the question of computer versus distributed processing connectionist theories Many of these questions dissolve if one distinguishes as I now do in Chapter II between free and embodied algorithms I have also added to my comments on artificial intelligence some reflections on Searle s Chinese Translator The irreducibility of machine functionalist psychology in my version or any other has been exaggerated Input output and state entities are token identical to physical or biological things of some sort while a machine system as a collection of recursive rules is type identical to representatives of equivalence classes This nuld technicality emerges in Chapter XI It entails that so called anomalous monism is right in one sense and wrong in another

Introduction to Classical Legal Rhetoric Michael H. Frost,2017-03-02 Lawyers law students and their teachers all too frequently overlook the most comprehensive adaptable and practical analysis of legal discourse ever devised the classical art of rhetoric Classical analysis of legal reasoning methods and strategy is the foundation and source for most modern theories on the topic Beginning with Aristotle s Rhetoric and culminating with Cicero s De Oratore and Quintilian s Institutio Oratoria Greek and Roman rhetoricians created a clear experience based theoretical framework for analyzing legal discourse This book is the first to systematically examine the connections between classical rhetoric and modern legal discourse It traces the history of legal rhetoric from the classical period to the present day and shows how modern theorists have unknowingly benefited from the classical works It also applies classical rhetorical principles to modern appellate briefs and judicial opinions to demonstrate how a greater familiarity with the classical sources can deepen our understanding of legal reasoning
