Excerpt from *An Elementary Treatise on Graphs* I have included as opportunity arose many applications of a practical kind and I am deeply indebted to my colleagues Professors Longbottom Maclean and Watkinson for the use of their Laboratory Note books on which I have drawn heavily for examples In the text and among the Exercises examples occur which have been manufactured simply to illustrate certain processes but examples in which the data are stated to be experimental are of course taken directly from the record of the experiments The answers given are such as can be obtained by the methods illustrated in the text they have been worked out by my friends Mr John Dougall and Mr John Miller and will be found it is hoped to be as accurate as the data warrant About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
