An Explosive Chess Opening Repertoire For Black:

An Explosive Chess Opening Repertoire for Black Jouni Yrjola, Jussi Tella, 2001 This book equips the reader with everything he needs to know to play Black in a game of chess Two experienced Finnish players have described an exciting repertoire based on the move 1 d6 in reply to whatever White s first move happens to be Black s strategy is hypermodern and dynamic White is encouraged to seize space while Black develops his pieces rapidly and actively waiting for the ideal moment to attack and destroy White s central bastion The variations advocated have been proven in top level play and have quick strike potential if White is at all careless or imprecise The repertoire is based around the Pirc Defence and the variations 1 d4 d6 2 c4 e5 and 1 d4 d6 2 Nf3 Bg4 which fit seamlessly together with 1 d6 systems against White s various flank openings

My First Chess Opening Repertoire for Black Vincent Moret, 2017-09-28 Every chess player needs to decide which openings he or she is going to play But where do you start The risk of drowning in the turbulent sea of chess opening theory is only too real for beginning amateurs Often your goals and ambitions will be misguided If you are trying to win in 20 moves copy what s in fashion among top GM s or memorize variations you are wasting your time Most likely you will never get to play your preparation and end up aimlessly switching from one opening to the other After the success of his volume for White experienced French chess trainer Vincent Moret now provides a complete ready to go chess opening repertoire for Black It consists of a sound set of lines that do not outdate rapidly do not require memorization and are easy to digest for beginners and post beginners To show the typical plans and the underlying ideas in the various lines of his repertoire Moret not only selected games of Grandmasters He also uses games of young improving players to highlight the errors they tend to make

Play 1...d6 Against Everything Erik Zude, Jörg Hickl, 2017-10-01 All the average club player needs is a small and manageable chess opening repertoire They don t have time and energy to study hundreds of pages of chess opening theory And why would they Amateur games are rarely decided in the opening Understanding structures and finding tactics are much more important Renowned German chess trainers Erik Zude and J rg Hickl have created an ideal club player s repertoire for Black This compact manual presents a set of lines that is conveniently limited in scope yet varied solid and complete The core repertoire is based on lines that the authors have successfully played at grand master level for decades the Antoshin variation of the Philidor Defence against 1 e4 and the Old Indian Defence against 1 d4 There is only a limited number of plans ideas and structures that you need to learn and very few forcing variations After an initial phase in which Black may at first sight look slightly passive you will develop your position with a sequence of strong standard moves and start your highly effective counterplay Zude and Hickl provide common sense guidance explain all typical characteristics and give practical examples If you have an Elo rating between 1400 and 2200 you don t need to look further because you can Play 1 d6 Against Everything

Play 1 d4 Richard Palliser, 2030-01-01 A comprehensive study book for players who would like to cultivate a reliable yet initiative seeking opening repertoire as White based on the opening moves 1 d4 followed by 2 c4

Specific main lines and side variations are given to combat Black's possible choices of the King's Queen's and Bogoljubow Indian defences as well as the modern Benoni and Benko Gambit. The author also recommends promising methods against the various Black defences to the Queen's Gambit as well as a number of offbeat lines. A practical opening guide for competitive players who prefer to build their games on solid foundations rather than indulge in risky speculation.

Side-stepping Mainline Theory Gerard Welling, Steve Giddins, 2019-09-05. The average chess player spends too much time on studying opening theory. In his day World Champion Emanuel Lasker argued that improving amateurs should spend about 5% of their study time on openings. These days club players are probably closer to 80% often focusing on opening lines that are popular among grandmasters. Club players shouldn't slavishly copy the choices of grandmasters. GMs need to squeeze every drop of advantage from the opening and therefore play highly complex lines that require large amounts of memorization. The main necessity for club players is to emerge from the opening with a reasonable position from which you can simply play chess and pit your own tactical and positional understanding against that of your opponent. Gerard Welling and Steve Giddins recommend the Old Indian Hanham Philidor set up as a basis for both Black and White. They provide ideas and strategies that can be learned in the shortest possible time and require the bare minimum of maintenance and updating. They deliver exactly what you need: rock solid positions that you know how to handle. By adopting a similar set up for both colours with similar plans and techniques you further reduce study time. With this compact and straightforward opening approach Welling and Giddins argue club players will have more time to focus on what is really decisive in the vast majority of non grandmaster games: tactics, positional understanding and endgame technique. **Chess Life**, 2007. *The Fianchetto Solution* Emmanuel Neiman, Samy Shoker, 2016-10-13. A Complete Solid and Flexible Chess Opening Repertoire for Black White with the King's Fianchetto. When experienced chess teacher Emmanuel Neiman learned that some of his pupils hesitated to play in competitions for fear of being crushed in the opening he wanted to help. Neiman knew that amateurs have little time to seriously study opening theory so he had to come up with a practical complete easy to learn and solid opening repertoire that would not outdate rapidly. And that is what he did. Neiman advises amateurs to play with both colours the flexible King's Fianchetto system where the Bishop is a defender of the King and at the same time an attacker. No matter what side you are you use the same basic ideas as White: you are targeting the light squares and as Black the dark squares while applying roughly the same strategies, plans and tactical motifs. Neiman has teamed up with Samy Shoker who gained the Grandmaster title by mainly playing the King's Fianchetto systems and sometimes beating 2700 rated players with it. The result is a complete and practical repertoire which will give club players a sound and flexible middlegame position they can feel at home in. In many lines Neiman and Shoker not only present a solid approach but also a sharp and aggressive alternative. The authors don't promise you a large advantage every time you play their system but one thing is certain: after studying this entertaining book you can play the opening confidently and you will be a better all round player because you

have learned many essential middlegame lessons Even very strong players will find the ideas of Neiman and Shoker useful as an easy to play occasional weapon **Solving in Style** John Nunn,2002 In this book John Nunn a top class grandmaster who is also one of the world s finest solvers explains the methods by which chess problems and studies are solved The logical and creative methods advocated while targeted at the solving of composed positions may also help players find startling tactical solutions in their games Solving in Style also constitutes an entertaining and insightful introduction to the world of problems and studies There are chapters on series problems and other unorthodox stipulations and also a discussion of specific themes such as the Novotny interference This classic text is one of few on this important subject and is now available again having been difficult to obtain for a decade Chess positions for solving are as old as the game itself and provide stimulating and beneficial exercise for chess players However while there is an abundance of books on chess puzzles and much specialist literature on studies and problems there is an astonishing dearth of guidance for solvers [Subject Guide to Books in Print](#),2001 **A Vigorous Chess Opening Repertoire for Black** Or Cohen,2014-05-22 In amateur chess games the most popular opening move for White is 1 e4 and the most reliable reply for Black is 1 e5 says FIDE Master Or Cohen In this book Cohen has created a vibrant and robust opening repertoire for Black after 1 e5 based on the Petroff Defence Cohen presents inventive ways for Black to fight for the initiative in this dependable opening He covers the entire spectrum the main variations as well as the most unexpected and bizarre sidelines In case White does not allow the Petroff Cohen offers a set of recommendations for Black that is no less important and principled his repertoire against the Vienna and the King s Gambit for example is new and explosive Most amateur White players faced with the Petroff will think that they will have an easy time based on the peaceful reputation of this great opening among top grandmasters Black players who have studied Or Cohen s book will make their life quite miserable
