An Inconvenient Book Real Solutions To The Worlds Biggest Problems:

An Inconvenient Book Glenn Beck, 2007-11-20 Glenn Beck the New York Times bestselling author of *The Great Reset* tackles some of our country's biggest problems in this funny outrageous and entertaining book Glenn Beck believes that the reason why some of our biggest problems never seem to get fixed is simple the solutions just aren't very convenient And as the host of a nationally syndicated radio show and a prime time television show on CNN Headline News Glenn Beck doesn't care much about convenience he cares about common sense Take the issue of poverty for example Over the last forty years America's poorest cities all had one simple thing in common but politicians will never reveal what that is or explain how easy it would be to change Global warming is another issue that's rife with lies and distortion How many times have we heard that carbon dioxide is responsible for huge natural disasters that have killed millions of people The truth is it's actually the other way around as CO2 has increased deaths from extreme weather have decreased But that would never be shown in an Al Gore slide show Combining honesty with a biting sense of humor *An Inconvenient Book* contains hundreds of these why have I never heard that before types of facts that will leave readers wondering how political correctness special interests and outright stupidity have gotten us so far away from the common sense solutions this country was built on *A World of Wounds* Nancy J. Manring, 2025-11-04

At the end of the Reagan administration American public opinion polls showed there were no discernible differences based on political party in response to the question Do you consider yourself an environmentalist However in the early 1990s a partisan gulf between conservatives and liberals emerged around environmental issues Today half as many Republicans self identify as environmentalists when compared to Democrats Political stagnation on climate action in turn has led to a growing number of Americans of all ages who experience ecological grief known as solastalgia and eco anxiety a chronic fear of environmental doom These emotions emerged in response to the existential distress associated with living in a world of relentless environmental damage and irreversible ecological losses a world of wounds This book offers an antidote to political frustration and hopelessness Nancy J Manring provides an indispensable analysis of the multi decade conservative war against American environmentalism and maps out realistic strategies for rebuilding a bipartisan environmental movement Nurturing authentic hope in contrast to blind optimism or false promises begins with an unflinching look at both planetary and political realities Choosing authentic hope is an ongoing process that requires emotional honesty courage and action This forceful book serves as both a tool for change and a spirited scholarly intervention
