Adaptive Decision Making And Intellectual Styles Springerbriefs In Psychology:

Adaptive Decision Making and Intellectual Styles Francesco Sofo, Cinzia Colapinto, Michelle Sofo, Salvatore Ammirato, 2013-03-19 This exciting publication provides the reader with a theoretical and practical approach to adaptive decision making based on an appreciation of cognitive styles in a cross cultural context The aim of this Brief is to describe the role of thinking through different options as part of the decision making process Since cognitive style influences decision behavior the book will first examine thinking styles which involve both cognitive and emotive elements as habits or preferences that shape and empower one's cognition and emotion The information contained in this Brief will be a useful resource to both researchers studying decision making as well as to instructors in the higher education sector and to human resource development practitioners especially those working in international multi cultural companies **The Malleability of Intellectual Styles** Li-fang Zhang, 2013-09-09 Intellectual styles are individuals preferred ways of using the abilities that they possess The extent to which one can change his or her intellectual style is a question of interest to both researchers and the general public This book presents the first comprehensive and systematic review of existing research on the malleability of intellectual styles By critically analyzing research findings derived from both cross sectional and longitudinal investigations performed over the past seven decades Li-fang Zhang demonstrates that intellectual styles can be modified through both socialization and purposeful training Professor Zhang elucidates the heuristic value of these findings for the development of adaptive intellectual styles in both academic and non academic settings She proposes further avenues of research that might advance scholarly understanding of the nature of and the potential for modifying intellectual styles **The Adaptive Decision Maker** John W. Payne, James R. Bettman, Eric J. Johnson, 1993-05-28 The Adaptive Decision Maker argues that people use a variety of strategies to make judgments and choices The authors introduce a model that shows how decision makers balance effort and accuracy considerations and predicts which strategy a person will use in a given situation A series of experiments testing the model are presented and the authors analyse how the model can lead to improved decisions and opportunities for further research **Adaptive Decision Maker** John W. Payne, James R. Bettman, Eric J. Johnson, 1993 **Decision Making Styles and the Psychology of Deviant Behaviors** Shannon Harlan, 2004 **Examining adaptive decision making frameworks** Matthew Tierney MacMahon, 2002 **Behavioral Decision Making** George Wright, 2013-03-11 **Decision Making and Rationality in the Modern World** Keith E. Stanovich, 2010 In *Decision Making and Rationality in the Modern World* Keith E Stanovich demonstrates how work in the cognitive psychology of decision making has implications for the large and theoretically contentious debates about the nature of human rationality Written specifically for undergraduate psychology students the book presents a very practical approach to decision making which is too often perceived by students as an artificial set of skills used only in academia and not in the real world Instead Stanovich shows how good decision making procedures support rational behavior that enables people to act most efficiently

to fulfill their goals He explains how the concept of rationality is understood in cognitive science in terms of good decision making and judgment Books in the Fundamentals of Cognition series serve as ideal instructional resources for advanced courses in cognitive psychology They provide an up to date well organized survey of our current understanding of the major theories of cognitive psychology The books are concise which allows instructors to incorporate the latest original research and readings into their courses without overburdening their students Focused without being too advanced and comprehensive without being too broad these books are the perfect resource for both students and instructors

Decision Modelling Insights in Cognition and Adaptive Decision Making Angelo Pirrone,2016 **Rational Choice in an Uncertain World** Reid Hastie,Robyn M. Dawes,2009-11-17 The authors are highly respected as leading figures in the field of judgment and decision making There are many existing books on topics related to judgment and decision making but this book makes a unique contribution to this field because of its systematic and scholarly approach and its breadth of coverage Robert Goldstone Indiana University Reid Hastie and Robyn Dawes are two of the most eminent researchers in the field I know these authors to be excellent writers and I have no doubt that their writing style will be suitable for my students William Goldstein University of Chicago In the new edition of this award winning text renowned authors Reid Hastie and Robyn Dawes compare and contrast the basic principles of rationality with actual behavior in making decisions This book explores theories and research findings from the field of judgment and decision making in a non technical manner using anecdotes as a teaching device Intended as an introductory textbook for advanced undergraduate and graduate students the material not only is of scholarly interest but is practical as well New to This Edition Chapter introductions conclusions and cross references between chapters make the text more student friendly An abundance of examples from areas such as finance medicine law and engineering anchor concepts to the real world Increased consideration of descriptive psychological models of decision making augment the original emphasis on normative rational Expected Utility Theory models bring the book up to date Balance among the three major approaches to judgment and decision making cognitive psychological analyses of mental processes and heuristics descriptive algebraic models of judgment and decision processes and rational models of decision making
