you combine them they become even more valuable Coverage includes Building whole teams that cut across silos and work together throughout a product s lifecycle Engaging product stakeholders earlier and far more effectively Overcoming inefficient wateratons and big batch waterfall thinking Getting past the curse of multi tasking Eliminating dangerous technical and project debt Repeatedly deploying release ready software in real user environments Delivering what customers really need not what you think they need Fixing the root causes of problems so they don t recur Learning from experience mastering continuous improvement Assessing whether you re just doing agile or actually being agile Being Agile will be indispensable for all software professionals now adopting agi for coaches managers engineers and team members who want to get more value from it and for students discovering it for the first time *Integrated Business Planning* Robert
