Agricultural Land Redistribution Toward Greater Consensus Agriculture And Rura:

Agricultural Land Redistribution Hans P. Binswanger-Mkhize, Camille Bourguignon, Rogerius Johannes Eugenius van den Brink, 2009-01-01 Despite 250 years of land reform all over the World important land inequalities remain especially in Latin America and Southern Africa While in these countries there is near consensus on the need for redistribution much controversy persists around how to redistribute land peacefully and legally often blocking progress on implementation This book focuses on the how of land redistribution in order to forge greater consensus among land reform practitioners and enable them to make better choices on the mechanisms of land reform Reviews and case studies describe and analyze the al

Agricultural Land Redistribution and Land Administration in Sub-Saharan Africa Frank F. K. Byamugisha, 2014-05-05 *Agricultural Land Redistribution and Land Administration in Sub Saharan Africa Case Studies of Recent Reforms* focuses on how to undertake land reforms in Sub Saharan Africa but with relevant lessons for other developing countries It provides details with case studies on how reforms were undertaken to address a pressing and controversial development challenge in Africa land ownership inequality and an intransigent development issue inefficiency and corruption in land administration An equally important contribution of the book is assessing reforms and highlighting valuable lessons for other countries contemplating reforms The six case studies collectively cover two main areas of land governance reforms in redistributing agricultural land and reforms in land administration The first two case studies discuss reforms in redistributing agricultural land in Malawi and South Africa part of the southern Africa region where land ownership inequalities rival those in Latin America The remaining case studies four in number are focused on addressing corruption and inefficiency in land administration in a variety of contexts of governance including stable and post conflict countries The case studies cover Decentralizing land administration with demonstrations from Uganda Ethiopia Tanzania and Ghana Developing post conflict land administration systems with examples from Liberia and Rwanda Re engineering and computerizing land information systems with examples from Ghana and Uganda and Improving management of government land through land inventories with examples drawn from Ghana and Uganda The common elements between sometimes disparate experiences provide lessons of relevance to African and other developing countries contemplating similar reforms The rigorous analysis and yet down to earth lessons of experience are a reflection of the authors deep global experience underpinned by personal participation in the reforms covered by the book This volume will be of interest to a wide audience including land specialists and practitioners African policy makers experts and managers in the international development community and the academia

What's Cooking Kateryna Schroeder, Julian Lampietti, Ghada Elabed, 2021-04-20 The digital agriculture revolution holds a promise to build an agriculture and food system that is efficient environmentally sustainable and equitable one that can help deliver the Sustainable Development Goals Unlike past technological revolutions in agriculture which began on farms the current revolution is being sparked at multiple points along the agrifood value chain The change is driven by the ability to

collect use and analyze massive amounts of machine readable data about practically every aspect of the value chain and by the emergence of digital platforms disrupting existing business models All this allows for drastically reduced transaction costs and pervasive information asymmetries that plague the agrifood system The success of the digital transformation however is not guaranteed as the risks it brings are numerous including those related to data governance and inadequate competition within and between digital platforms What s Cooking Digital Transformation of the Agrifood System investigates how digital technologies can accelerate the transformation of the agrifood system by increasing efficiency on the farm improving farmers access to output input and financial markets strengthening quality control and traceability and improving the design and delivery of agriculture policies It also identifies a key role for the public sector in maximizing the benefits of this process while minimizing its risks through enabling an innovation ecosystem featuring open datasets digital platforms digital entrepreneurship digital payment systems and digital skills and encouraging equitable technology adoption

The Safe Food Imperative Steven Jaffee, Spencer Henson, Laurian Unnevehr, Delia Grace, Emilie Cassou, 2018-12-11 Food safety hazards are increasingly being recognized as a major public health problem worldwide yet among developing countries there is limited understanding of the wider ranging socio economic costs of unsafe food and the benefits of remedial or preventative measures This limited evidence base has led many countries to underinvest in food safety or invest inefficiently in reaction to serious outbreaks of foodborne illness other food scares or trade interruptions For many countries experiencing rapid urbanization and dietary changes the growing complexity of food safety hazards is outpacing if not overwhelming prevailing food safety management capacity both in government and in supply chains This report strengthens the economic case for increased public investment and other policy attention on food safety in developing countries It is directed primarily at policy makers although researchers development practitioners and food safety specialists will also find its content of value By synthesizing and interpreting the available evidence on the economic costs of unsafe food in relation to both domestic markets and trade the report positions food safety as an integral part of economic development and food system modernization It goes on to provide guidance on ways in which public policy and investment can improve food safety awareness and behavior from farm to fork

Building Competitiveness in Africa's Agriculture C. Martin Webber, Patrick Labaste, 2009-12-16 Value chain based approaches offer tremendous scope for market based improvements in production productivity rural economy diversification and household incomes but are often covered by literature that is too conceptual or heavily focused on analysis This has created a gap in the information available to planners practitioners and value chain participants Furthermore few references are available on how these approaches can be applied specifically to developing agriculture in Africa Building Competitiveness in Africa's Agriculture A Guide to Value Chain Concepts and Applications describes practical implementation approaches and illustrates them with scores of real African agribusiness case studies Using these examples the Guide presents a range of concepts analytical tools and methodologies centered on the

value chain that can be used to design implement and evaluate agricultural and agribusiness development initiatives It stresses principles of market focus collaboration information sharing and innovation The Guide begins by examining core concepts and issues related to value chains A brief literature review then focuses on five topics of particular relevance to African agricultural value chains These topics address challenges faced by value chain participants and practitioners that resonate through the many cases described in the book The core of the book presents methodological tools and approaches that blend important value chain concepts with the topics and with sound business principles The tools and case studies have been selected for their usefulness in supporting market driven private sector initiatives to improve value chains The Guide offers 13 implementation approaches presented within the implementation cycle of a value chain program followed by descriptions of actual cases Roughly 60 percent of the examples are from Africa while the rest come from Europe Latin America and Asia The Guide offers useful guidance to businesspeople policy makers representatives of farmer or trade organizations and others who are engaged in agro enterprise and agribusiness development These readers will learn how to use value chain approaches in ways that can contribute to sound operational decisions improved market linkage and better results for enterprise and industry development

Agriculture and Rural Development in a Globalizing World Prabhu Pingali, Gershon Feder, 2017-05-08 Rapid structural transformation and urbanization are transforming agriculture and food production in rural areas across the world This textbook provides a comprehensive review and assessment of the multifaceted nature of agriculture and rural development particularly in the developing world where the greatest challenges occur It is designed around five thematic parts Agricultural Intensification and Technical Change Political Economy of Agricultural Policies Community and Rural Institutions Agriculture Nutrition and Health and Future Relevance of International Institutions Each chapter presents a detailed but accessible review of the literature on the specific topic and discusses the frontiers in research and institutional changes needed as societies adapt to the transformation processes All authors are eminent scholars with international reputations who have been actively engaged in the contemporary debates around agricultural development and rural transformation

Agricultural Development in Brazil Antonio M. Buainain, Rodrigo Lanna, Zander Navarro, 2019-05-20 In the last few decades Brazilian agriculture has experienced a seismic transformation and its contradictory facets have fed different and opposing narratives regarding recent changes This book covers these changes exploring the issues from several empirical and analytical angles including the role of agriculture in the contemporary Brazilian economy the dynamics of Brazilian agricultural value chains environmental challenges and the processes of social differentiation Brazilian agriculture continues to be viewed in the international literature either through the lenses of the past century those of former problems relating to land use and land tenure or apologetically This collection of essays aims at updating the current interpretations providing objective accounting of the main transformations its determinants results contradictions and limitations As it covers the most relevant traits of Brazilian agricultural and rural

development the book will provide the reader with an encompassing view of contemporary Brazilian agriculture including the positive and negative sides of the so called tropical agriculture revolution It highlights the tremendous economic potential as well as the continuing structural heterogeneity concentration of production and marginalization of millions of small farmers Written in an engaging and accessible style this book will be perfect for all those interested in learning about Brazilian agriculture It will be of particular interest to undergraduate and graduate students of economic development agricultural economics rural sociology comparative economic development rural development and agricultural policies *Economics of Agricultural Development* George W. Norton, Jeffrey Alwang, William A. Masters, 2021-08-01 Economics of Agricultural Development examines the causes severity and effects of poverty population growth and malnutrition in developing countries It discusses potential solutions to these problems progress made in many countries in recent years and the implications of globalization for agriculture poverty and the environment Topics covered in the book include Means for utilizing agricultural surpluses to further overall economic development The sustainability of the natural resource environment Gender issues in relation to agriculture and resource use The contribution of improved technologies to agricultural development The importance of agricultural policies and institutions to development and trade Actions to encourage more rapid agricultural and economic development This new edition reflects the following developments Growth in environmental challenges due to climate change Continued progress in agricultural and economic development in many low income countries while other countries and regions are being left behind Continued growth in demand for higher valued farm products This book is essential reading for undergraduate students seeking to understand the economics of agricultural development and the world food system including environmental and human consequences international trade and capital flows It contains a wealth of real world case studies and is accompanied by a website [Success in Agricultural Transformation](#) Isabelle Tsakok, 2011-08-01 To lift and keep millions out of poverty requires that smallholder agriculture be productive and profitable in the developing world Do we know how to make this happen Researchers and practitioners still debate how best to do so The prevailing methodology which claims causality from measures of statistical significance is inductive and yields contradictory results In this book instead of correlations Isabelle Tsakok looks for patterns common to cases of successful agricultural transformation and then tests them against other cases She proposes a hypothesis that five sets of conditions are necessary to achieve success She concludes that government investment in and delivery of public goods and services sustained over decades is essential to maintaining these conditions and thus successfully transform poverty ridden agricultures No amount of foreign aid can substitute for such sustained government commitment The single most important threat to such government commitment is subservience to the rich and powerful minority **The Land Governance Assessment Framework** Klaus Deininger, Harris Selod, Anthony Burns, 2012 Increased global demand for land posits the need for well designed country level land policies to protect long held rights facilitate land access and address any

constraints that land policy may pose for broader growth While the implementation of land reforms can be a lengthy process the need to swiftly identify key land policy challenges and devise responses that allow the monitoring of progress in a way that minimizes conflicts and supports broader development goals is clear The Land Governance Assessment Framework LGAF makes a substantive contribution to the land sector by providing a quick and innovative tool to monitor land governance at the country level The LGAF offers a comprehensive diagnostic tool that covers five main areas for policy intervention Legal and institutional framework Land use planning management and taxation Management of public land Public provision of land information and Dispute resolution and conflict management The LGAF assesses these areas through a set of detailed indicators that are rated on a scale of pre coded statements from lack of good governance to good practice While land governance can be highly technical in nature and tends to be addressed in a partial and sporadic manner the LGAF posits a tool for a comprehensive assessment taking into account the broad range of issues that land governance encompasses while enabling those unfamiliar with land to grasp its full complexity The LGAF will make it possible for policymakers to make sense of the technical levels of the land sector benchmark governance identify areas that require further attention and monitor progress It is intended to assist countries in prioritizing reforms in the land sector by providing a holistic diagnostic review that can inform policy dialogue in a clear and targeted manner In addition to presenting the LGAF tool this book includes detailed case studies on its implementation in five selected countries Peru the Kyrgyz Republic Ethiopia Indonesia and Tanzania

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
