practicing professionals Graduate students training as researchers in the quality field will also find useful material The book has been used as the text for a Professional Series Massive Open Online Course offered by the Technical University of Munich on edX org through which tens of thousands of participants from all over the world have received training in quality methods According to Professor Dr Holly Ott who chose the book for the course the text is one of the main factors contributing to success of this MOOC The Third Edition has been fully revised to be friendly for self study reflects changes in the standards referenced such as ISO 9000 and includes new examples of application of statistical tools in health care industry Features Reviews the history of quality movement in the U S and abroad Discusses Quality Cost analysis and quality s impact on a company s bottom line Explains finding customer needs and designing the product using House of Quality Covers selection of product parameters using DOE and reliability principles Includes control charts to control processes to make the product right the first time Describes use of capability indices Cp and Cpk to meet customer needs Presents problem solving methodology and tools for continuous improvement Offers ISO 9000 Baldrige and Six Sigma as templates for creating a quality system

Measuring Strategies in Tactile Coordinate Metrology Robert Roithmeier,2014-10-24

Today there is hardly any workpiece whose form parameters cannot be measured by means of coordinate measuring machines The universal use of these machines allows a wide range of application of this technology which however increases inevitably the complexity of its handling The numerous options of the machine specific operating software on the one hand and the various theoretical considerations regarding a target oriented treatment of measuring jobs on the other hand result in the fact that the measuring results obtained from the same coordinate measuring machine on the same workpiece under similar conditions may differ In Order to increase the comparability of measuring results it is necessary to provide the operators of coordinate measuring machines in addition to a well founded AUKOM training with procedure options for planning performing evaluating and documenting measurements This book by the ZEISS Metrology Academy makes a contribution towards achieving these targets
