*proportional segments between parallel lines concept geometry* - Aug 05 2023

web transcript when a line is drawn parallel to one side in a triangle two similar triangles are formed because corresponding angles yield the aa similarity shortcut because the triangles are similar the segments formed by the parallel line are proportional segments

*parallel lines and transversals read geometry* - May 22 2022

web jul 18 2012 the triangle proportionality theorem states that if a line parallel to one side of a triangle intersects the other two sides then it divides those sides proportionally we can extend this theorem to a situation outside of triangles where we have multiple parallel lines cut by transversals
