  - Election of Ronald Regan rejection of liberal changes in the past decades
- Regan's policies on economics
  - **Reaganomics** were **supply-side economics** which believed American prosperity would be achieved through tax cuts and reduced federal spending which would lead to more investment in the private sector which would lead to an increase in productivity and jobs
    - Rejection of **Keynesian Economics** which dominated American economies throughout the 20th century which said prosperity was achieved via increased government spending
  - The **Economic Recovery Act of 1981** cut income taxes by 25% over the next 3 years and cut taxes for the very wealthy like corporate income, capital gains, and inheritance
  - The Regan administration did cut federal spending on welfare programs like food stamps and public transportation which saved the federal budget \$40 billion dollars BUT vastly increased spending for the US military, on which he spend \$150 billion
  - With this spending, the federal budget ran a 200-300 billion deficit a year which meant welfare programs were off the table
