Sepharial, 2010-09 First published in 1898 this is a very different astrology book from what we have now. There are extensive delineations for the signs of the zodiac especially when found on the ascendant. There are delineations of planets in signs when they are in the first house or are the chart ruler in both cases describing the physical appearance. There are delineations of planets in the various houses which will also serve for the planetary rulerships of the houses. There are only sketchy notes on aspects. So far as the pure astrology of planets in signs in houses in aspect there is almost nothing at all. The reason is found in the second part of the book. We are not reading the chart as a psychological abstraction. We are instead looking for specific traits attempting to answer specific questions. Will we have a profession? What kind of marriage? What kind of children? Will we vanquish our enemies or submit to them? What kind of illness? We then find the houses of the horoscope which rule the question and then delineate the signs/planets we find there. These are by the way the sort of questions that clients would ask if they only knew we could give answers. The sort of things that astrologers themselves want to know. In the process we learn how to read a chart, get real meaning from it. We get ideas from one section and then apply them to other sections. There are hundreds and hundreds of useful aphorisms except that Sepharial doesn't label them as such. Get this book, study it, underline key passages, scribble in the margins. You will learn more from this book than most all others put together. Mergent Industrial Manual, 2002 **Pediatric Kidney Disease** Denis F. Geary, Franz Schaefer, 2017-02-16

The new edition of this valuable clinical resource offers a state-of-the-art comprehensive review on every clinical condition encountered in pediatric nephrology. International experts present the latest knowledge on epidemiology, diagnosis, management, and prognosis in one concise, clinically focused text in which care has been taken to couple just the right amount of need-to-know basic science with practical clinical guidance that will enable the reader to make efficient, informed decisions. The topics covered include disorders of renal development, glomerular disorders, the kidney and systemic disease, renal tubular disorders, tubulointerstitial disease, urinary tract disorders, acute kidney injury, hypertension, chronic and end-stage renal disease, and renal replacement therapy. The full-color, highly visual, meticulously crafted format will ensure that the practitioner is able to source and apply information with remarkable ease. **O'Connell Street** Nicola Pierce, 2021-09-13
