

An aerial photograph of the Great Wall of China, showing its iconic stone structure as it snakes across a rugged, mountainous terrain. The wall's path is highlighted by the play of light and shadow on its surface. In the distance, a small cluster of traditional Chinese buildings is visible on a hillside.

Asia America And The Transformation Of Geopolitics:

Asia, America, and the Transformation of Geopolitics William H. Overholt, 2008 A provocative account of the state of Asian geopolitics and US foreign policy in Asia *Shaping U.S. Military Forces for the Asia-Pacific* Michael R. Kraig, 2014-06-04 The first twenty years of post Cold War US defense and diplomatic policies toward Asia have looked a good deal like the previous 50 namely continued deterrence based upon overwhelming offensive military predominance In East Asia all powers harbor common and divergent interests based on fragmented nationalist identities and complex economic interdependence In this multipolar Asian system new Chinese military capabilities could support both the wish to secure its own interests as well as a more expansive vision for regional leadership which might harbor a destabilizing geopolitical agenda How the United States addresses this reality via military procurements and employment concepts for the Asian theater could either detract from or enhance crisis stability The US defense establishment must reorient its force posture to save money manage conflicts of interest and prevent future interstate crises This analysis provides a framework for how the United States should ideally structure and use military power so as to best support the diplomatic resolution of conflicting interests without resorting to full scale warfare It also critiques the usual Western military focus on offensive strategic predominance in force postures itself often fuelled by the unrealistic pursuit of the opponent s complete submission via victory in decisive battles The Future of Global Relations T. Paupp, 2009-06-22 The collapse of US global hegemony means that the future of global relations will be defined by an integrated and mutually co operative world order of regions in which there are multiple centres of power These centres will continue to mature under the ideology of regionalism and through the long historical process of regionalization *A History of Diplomacy* Jeremy Black, 2010-05-15 In A History of Diplomacy historian Jeremy Black investigates how a form of courtly negotiation and information gathering in the early modern period developed through increasing globalization into a world shaping force in twenty first century politics The monarchic systems of the sixteenth century gave way to the colonial development of European nations which in turn were shaken by the revolutions of the eighteenth century the rise and progression of multiple global interests led to the establishment of the modern day international embassy system In this detailed and engaging study of the ever changing role of international relations the aims achievements and failures of foreign diplomacy are presented along with their complete historical and cultural background **Global Strategic Assessment 2009** Patrick M. Cronin, U.S.), 2021-05-03 Offers a conceptual pathway for U S policymakers to begin recalibrating America s security role to reverse what has appeared to be a widening gap between U S ends and means now and in the future Provides an overview of eight broad trends shaping the international security environment a global analysis of the world s seven regions to consider important developments in their distinctive neighborhoods and an examination of prospective U S contributions military capabilities and force structure national security organization alliances and partnerships and strategies **American Images of China** Oliver

Turner,2014-04-16 The United States and China are arguably the most globally consequential actors of the early twenty first century and look set to remain so into the foreseeable future This volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today Turner addresses three key questions What have been the dominant American images of China and the Chinese across the full lifespan of Sino US relations How have historical and contemporary American images of China and the Chinese enabled and justified US China policy What role does US China policy play in the production and reproduction of American images of China Exploring and evaluating a wide ranging variety of sources including films and television programmes newspaper and magazine articles the records and journals of politicians and diplomats and governmental documents including speeches and legal declarations this work will be of great interest to students and scholars of US foreign policy American politics China studies and international relations
