Cover **The Mathematical Olympiad Handbook** Anthony Gardiner, 1997 Mathematical Olympiad competitions started in Hungary at the end of the nineteenth century and are now held internationally They bring together able secondary school pupils who attempt to solve problems which develop their mathematical skills Olympiad problems are unpredictable and have no obvious starting point and although they require only the skills learnt in ordinary school problems they can seem much harder The Mathematical Olympiad Handbook introduces readers to these challenging problems and aims to convince them that Olympiads are not just for a select minority The book contains problems from the first 32 British Mathematical Olympiad BMO papers 1965 96 and gives hints and outline solutions to each problem from 1975 onwards An overview is given of the basic mathematical skills needed and a list of books for further reading is provided Working through the exercises provides a valuable source of extension and enrichment for all pupils and adults interested in mathematics **B.H. Blackwell** B.H. Blackwell Ltd, 1928 **Principles of Stellar Dynamics** S. Chandrasekhar, 2005-05-13 In this classic text a Nobel Prize winning astrophysicist presents the theory of stellar dynamics as a branch of classical dynamics a discipline in the same general category as celestial mechanics His method offers the advantages of clarifying the theory's fundamental issues and defining its underlying motivations S Chandrasekhar investigates two areas The first concerns problems in which the time of relaxation of a stellar system is central His method consists of analyzing the effects of stellar encounters in terms of the two body problem of classical dynamics and applying this theory to the dynamics of star clusters The second area investigates problems centering around Liouville's theorem and the solutions of the equation of continuity here the author discusses the dynamic implications of the existence of a field of differential motions which appears to be the most striking kinematic feature of the galaxy and the extragalactic systems This edition includes two papers by the author that were published after Principles of Stellar Dynamics and that have been studied and quoted extensively New Methods in Stellar Dynamics originally published in the Annals of the New York Academy of Sciences and Dynamical Friction originally published in The Astrophysical Journal **Technical Books in Print**, 1974 **MAA Notes**, 1983 **Problem Solving in the Mathematics Curriculum** Alan H.
