Islands Philippines. Bureau of Audits, 1912 *North American Integration* Gaspare M. Genna, David A. Mayer-Foulkes, 2013-07-18 The course of events since the implementation of NAFTA has had unexpected elements with significant impacts on North American integration First has been the rise of China as a larger source of imports and production partner than Mexico Second has been the rise of security concerns since September 11 2001 The result has been much stronger integration between Canada and the US than with Mexico Migration issues are now linked with security which has risen to a top priority in the international agenda While liberalization has furnished strong economic incentives for integration it has not provided a sufficient guide for the political process which requires leadership and appropriate institutions to coordinate and regulate the special interest groups A coherent and effective North American integration would be a valuable asset in the context of global integration and competition yet the issues involved are quite complex and varied North American Integration An Institutional Void in Migration Security and Development examines the current state of North American integration Editors Gaspare M Genna and David A Mayer Foulkes gather an international group of experts to give a broad coherent picture of the current multifaceted process of integration and find that institutional development is an essential component Divided into three sections the book Discuss the determinants of integration and shows that the institutional characteristics of the three countries including democracy and basic rights are the most important Provides examples of institutional building in contexts for which institutions are lacking specifically labor migration and health issues Examines issues such as overall security arrangements trade drug related violence energy and the continuing wage gap among the countries which have an important bearing on integration **Youth Unemployment and Joblessness** Alfredo Sánchez-Castañeda, Francesca Sperotti, 2013-01-16 Youth unemployment and joblessness are major issues for national governments and international organizations across the globe In this respect the school to work transition challenge is increasingly raising the interest of companies education and training institutions families and young people themselves who are often involved in precarious and illegal forms of employment in many countries of the world In the field of industrial and

labour relations the school to work perspective seems particularly suitable for policy formulation and assessment the broad and complex range of tools strategies and policies for enabling youth training and their access to the labour market is deserving of a closer analysis at an international level in a time when jobless recovery threatens national economies The ADAPT LABOUR STUDIES BOOK SERIES has in connection been set up with a view to achieving a better understanding of the causes consequences and possible responses to the issue in a global dimension through an interdisciplinary and comparative approach

Quixote's Soldiers David Montejano, 2010-06-23 Detail s the grassroots interplay among the variety of ideologies individuals and organizations that made up the Chicano movement in San Antonio Texas Journal of American History In the mid 1960s San Antonio Texas was a segregated city governed by an entrenched Anglo social and business elite The Mexican American barrios of the west and south sides were characterized by substandard

housing and experienced seasonal flooding Gang warfare broke out regularly Then the striking farmworkers of South Texas marched through the city and set off a social movement that transformed the barrios and ultimately brought down the old Anglo oligarchy In *Quixote's Soldiers* David Montejano uses a wealth of previously untapped sources including the congressional papers of Henry B Gonzalez to present an intriguing and highly readable account of this turbulent period Montejano divides the narrative into three parts In the first part he recounts how college student activists and politicized social workers mobilized barrio youth and mounted an aggressive challenge to both Anglo and Mexican American political elites In the second part Montejano looks at the dynamic evolution of the Chicano movement and the emergence of clear gender and class distinctions as women and ex gang youth struggled to gain recognition as serious political actors In the final part Montejano analyzes the failures and successes of movement politics He describes the work of second generation movement organizations that made possible a new and more representative political order symbolized by the election of Mayor Henry Cisneros in 1981 A most welcome addition to the growing literature on the Chicano movement of the 1960s and 1970s *Pacific Historical Review* *Philippine Education*, 1909
