Agricultural Extension And Rural Development Breaking Out Of Knowledge Transfer Traditions:

Agricultural Extension and Rural Development Ray Ison, Raymond L. Ison, David Russell, 2007-08-16 This 1999 book proposes an alternative approach to research and development based on the needs of the farming community **Rural development** Kristof Van Assche, Anna-Katharina Hornidge, 2023-09-04 This book offers a unique perspective on rural development by discussing the most influential perspectives and rendering their risks and benefits visible The authors do not present a silver bullet Rather they give students researchers community leaders politicians concerned citizens and development organizations the conceptual tools to understand how things are organized now which development path has already been taken and how things could possibly move in a different direction Van Assche and Hornidge pay special attention to the different roles of knowledge in rural development both expert knowledge in various guises and local knowledge Crafting development strategies requires understanding how new knowledge can fit in and work out in governance Drawing on experiences in five continents the authors develop a theoretical framework which elucidates how modes of governance and rural development are inextricably tied A community is much better placed to choose direction when it understands these ties **Rural Development for Sustainable Social-ecological Systems** Claudia Baldwin, Séverine van Bommel, 2023-07-31 This book provides an overview of interdisciplinary approaches that have applied social science to research focused on issues around food agriculture and natural resource management The book demonstrates that those who work in rural sociology either as researchers or practitioners apply community development and participatory techniques to socio environmental interaction The book discusses how the evolving concept of interconnected social and ecological systems SES emerged recognizing the inherent complexity adaptive nature and resilience of such systems This book engages with contemporary theory as well as new cutting edge transdisciplinary research evidenced in case studies from three continents **Systems Practice: How to Act in a Climate Change World** Ray Ison, 2010-07-20 It is now accepted that humans are changing the climate of the Earth and this is the most compelling amongst a long litany of reasons as to why collectively we have to change our ways of thinking and acting Most people now recognise that we have to be capable of adapting quickly as new and uncertain circumstances emerge this capability will need to exist at personal group community regional national and international levels all at the same time Systems Practice is structured into four parts Part I introduces the societal need to move towards a more systemic and adaptive governance against the backdrop of human induced climate change Part II unpacks what is involved in systems practice by means of a juggler metaphor examining situations where systems thinking offers useful understanding and opportunities for change Part III identifies the main factors that constrain the uptake of systems practice and makes the case for innovation in practice by means of systemic inquiry systemic action research and systemic intervention The book concludes with Part IV which critically examines how systems practice is or might be utilised at different levels from the personal to the societal The

development of our capabilities to think and act systemically is an urgent priority and Systems Practice aims to show how to do systems thinking and translate that thinking into praxis theory informed practical action which will be welcomed by those managing in situations of complexity and uncertainty across all domains of professional and personal concern **For the Love of Cybernetics** Jocelyn Chapman, 2020-05-21 For the Love of Cybernetics Personal Narratives by Cyberneticians is a collection of personal accounts that offer unique insights into cybernetics via the personal journeys of nine individuals For the authors in this collection cybernetics is not their area of interest it is how they think about what they do and it is their practice Ray Ison Bruce Clarke Frank Galuzska Paul Pangaro Klaus Krippendorff Peter Tuddenham Lucas Pawlik Bernard Scott and Jocelyn Chapman differ in their lineage emphasis and engagement with cybernetics What they have in common is that they share the belief that cybernetics is not a tool to apply here and there but a unifying way of seeing the world that transforms how we behave thus increasing possibilities for positive systemic change This book was originally published as a special issue of the journal World Futures *Sustainable Intensification in Smallholder Agriculture* Ingrid Oborn, Bernard Vanlauwe, Michael Phillips, Richard Thomas, Willemien Brooijmans, Kwesi Atta-Krah, 2017-02-17 Sustainable intensification has recently been developed and adopted as a key concept and driver for research and policy in sustainable agriculture It includes ecological economic and social dimensions where food and nutrition security gender and equity are crucial components This book describes different aspects of systems research in agriculture in its broadest sense where the focus is moved from farming systems to livelihoods systems and institutional innovation Much of the work represents outputs of the three CGIAR Research Programs on Integrated Systems for the Humid Tropics Aquatic Agricultural Systems and Dryland Systems The chapters are based around four themes the conceptual underpinnings of systems research sustainable intensification in practice integrating nutrition gender and equity in research for improved livelihoods and systems and institutional innovation While most of the case studies are from countries and agro ecological zones in Africa there are also some from Latin America Southeast Asia and the Pacific *Food Security and Land Use Change under Conditions of Climatic Variability* Victor R. Squires, Mahesh K. Gaur, 2020-05-12 This volume analyzes the global challenges of food security land use changes and climate change impacts on food production in order to recommend sustainable development policies anticipate future food services and demands and identify the economic benefits and trade offs of meeting food security demands and achieving climate change mitigation objectives The key points of analysis that form the conclusions of this book are based on measuring the quantity and quality of land and water resources and the rate of use of sustainable management of these resources in the context of socio economic factors including food security poverty and climate change impacts In six parts readers will learn about these crucial dimensions of the affects of climate change on food security and will gain a better understanding of how to assess the trade offs when combating multiple climate change challenges and how to develop sustainable solutions to these problems The book presents multidimensional perspectives from expert contributors offering

holistic and strategic approaches to link knowledge on climate change and food security with action in the form of policy recommendations with a focus on sociological and socio economic components of climate change impacts The intended audience of the book includes students and researchers engaged in climate change and food security issues NGOs and policy makers

Farming Systems Research into the 21st Century: The New Dynamic Ika Darnhofer, David Gibbon, Benoît Dedieu, 2012-05-30 Farming Systems Research has three core characteristics it builds on systems thinking it depends on the close collaboration between social and biophysical sciences and it relies on participation to build co learning processes Farming Systems Research posits that to contribute towards sustainable rural development both interdisciplinary collaborations and local actor engagement are needed Together they allow for changes in understanding and changes in practices This book gives an overview of the insights generated in 20 years of Farming Systems Research It retraces the emergence and development of Farming Systems Research in Europe summarises the state of the art for key areas and provides an outlook on new explorations especially those tackling the dynamic nature of farming systems and their interaction with the natural environment and the context of action

Call of the Reed Warbler Charles Massy, 2018-08-31 Charles Massy has written a definitive masterpiece that takes its place along with the writings of Aldo Leopold Wendell Berry Masanobu Fukuoka Humberto Maturana and Michael Pollan No work has more brilliantly defined regenerative agriculture and the breadth of its restorative impact upon human health biodiversity climate and ecological intelligence Paul Hawken In Call of the Reed Warbler Charles Massy explores regenerative agriculture and the vital connection between our soil and our health It is the story of how a grassroots revolution a true underground insurgency can save the planet help reduce and reverse climate change and build healthy people and healthy communities pivoting significantly on our relationship with growing and consuming food Using his personal experience as a touchstone from an unknowing chemical using farmer with dead soils to a radical ecologist farmer carefully regenerating a 2000 hectare property to a state of natural health Massy tells the real story behind industrial agriculture and the global profit obsessed corporations driving it With evocative stories he shows how other innovative and courageous farmers are finding a new way At stake is not only a revolution in human health and in our communities but the very survival of the planet For farmers backyard gardeners food buyers health workers policy makers and public leaders alike Call of the Reed Warbler offers a tangible path forward and a powerful and moving paean of hope It is not too late to regenerate the earth Call of the Reed Warbler shows the way forward for the future of our food supply our planet and our health Part lyrical nature writing part storytelling part solid scientific evidence part scholarly research part memoir this book is an elegant manifesto an urgent call to stop trashing the Earth and start healing it The Guardian

Systems Practice: How to Act Ray Ison, 2017-08-10 This book shows how to do systems thinking and translate that thinking into praxis theory informed practical action It will be welcomed by those managing or governing in situations of complexity and uncertainty across all domains of professional and personal life The development of capabilities

to think and act systemically is an urgent priority Humans are now a force of nature affecting whole earth dynamics including the earth's climate we live in an Anthropocene or Capitalocene and are confronted by the emergence of a post truth big data world What we have developed organisationally and institutionally seems very fragile An imperative exists to recover whatever systemic sensibilities we still retain to foster systems literacy and to invest in systems thinking in practice capability This will be needed in future at personal group community regional national and international levels all at the same time Systems Practice How to Act is structured into four parts Part I introduces the societal need to invest in systems thinking in practice in contexts of uncertainty and complexity epitomised by the challenges of responding to human induced climate change Part II unpacks what is involved in systems practice by means of a juggler isophor examining situations where systems thinking offers useful understanding and opportunities for change Part III identifies the main factors that constrain the uptake of systems practice and makes the case for innovation in practice by means of systemic inquiry systemic action research and systemic intervention The book concludes with Part IV which critically examines how systems practice is or might be utilised at different levels from the personal to the societal div
