Aiding Violence Peter Uvin, 1998 Includes statistics Killing Sub-Saharan Africa with Aid Humphrey Orjiako, 2001 Annotation Orijiako who is not identified examines the hypothesis that rather than promoting growth and development in sub Saharan Africa foreign aid interventions may have contributed in no small measure to the poor performance of the region s economies Challenging conventional views that problems are technical details of delivery or administration he suggests that an economy operating under appropriate circumstances and conditions may not require foreign aid to succeed and presents historical records common sense and cognate experiments to bolster the view c Book News Inc *Aiding Violence Or Building Peace?* Jonathan Goodhand, 2002 *Responsibility to Protect* Rama Mani, Thomas G. Weiss, 2013-03-01 This volume explores in a novel and challenging way the emerging norm of the Responsibility to Protect R2P initially adopted by the United Nations World Summit in 2005 following significant debate throughout the preceding decade This work seeks to uncover whether this norm and its founding values have resonance and grounding within diverse cultures and within the experiences of societies that have directly been torn apart by mass atrocity crimes The contributors to this collection analyze the responsibility to protect through multiple disciplines philosophy religion and spirituality anthropology and aesthetics in addition to international relations and law to explore what light alternative perspectives outside of political science and international relations shed upon this emerging norm In each case the disciplinary analysis emanates from the global South and from scholars located within countries that experienced violent political upheaval Hence they draw upon not only theory but also the first hand experience with conscience shocking crimes Their retrospective and prospective analyses could and should help shape the future implementation of R2P in accordance with insights from vastly different contexts Offering a cutting edge contribution to thinking in the area this is essential reading for all those with an interest in humanitarian intervention peace and conflict studies critical security studies and peacebuilding **War and Conflict in Africa** Paul D. Williams, 2013-04-26 After the Cold War Africa earned the dubious distinction of being the world s most bloody continent But how can we explain this proliferation of armed conflicts What caused them and what were their main characteristics And what did the world s governments do to stop them In this fully revised and updated second edition of his popular text Paul Williams offers an in depth and wide ranging assessment of more than six hundred armed conflicts which took place in Africa from 1990 to the present day from the continental catastrophe in the Great Lakes region to the sprawling conflicts across the Sahel and the web of wars in the Horn of Africa Taking a broad comparative approach to examine the political contexts in which these wars occurred he explores the major patterns of organized violence the key ingredients that provoked them and the major international responses undertaken to deliver lasting peace Part I Contexts provides an overview of the most important attempts to measure the number scale and location of Africa s armed conflicts and provides a conceptual and political sketch of the terrain of struggle upon which these wars were waged Part II Ingredients analyses the role of five

widely debated features of Africa's wars the dynamics of neopatrimonial systems of governance the construction and manipulation of ethnic identities questions of sovereignty and self-determination as well as the impact of natural resources and religion Part III Responses discusses four major international reactions to Africa's wars attempts to build a new institutional architecture to help promote peace and security on the continent this architecture's two main policy instruments peacemaking initiatives and peace operations and efforts to develop the continent War and Conflict in Africa will be essential reading for all students of international peace and security studies as well as Africa's international relations **A**

Dictionary of the Welsh Language explained in English William Owen Pughe, 1832 **Anti-Impunity and the Human Rights Agenda** Karen Engle, Zinaida Miller, D. M. Davis, 2016-12-15 In the twenty-first century fighting impunity has become both the rallying cry and a metric of progress for human rights The new emphasis on criminal prosecution represents a fundamental change in the positions and priorities of students and practitioners of human rights and transitional justice it has become almost unquestionable common sense that criminal punishment is a legal political and pragmatic imperative for addressing human rights violations This book challenges that common sense It does so by documenting and critically analyzing the trend toward an anti impunity norm in a variety of institutional and geographical contexts with an eye toward the interaction between practices at the global and local levels Together the chapters demonstrate how this laser focus on anti impunity has created blind spots in practice and in scholarship that result in a constricted response to human rights violations a narrowed conception of justice and an impoverished approach to peace **The Reconfiguration of Political**

Order in Africa Denis Tull, 2005 *Reconstructing Afghanistan* William Maley, Susanne Schmeidl, 2014-11-27 This book identifies some of the main lessons for civil military interactions that can be derived from the experiences of Provincial Reconstruction Teams PRTs in Afghanistan The book has three main themes Firstly the volume analyses why the ways in which civil and military actors interact in theatres of operations such as Afghanistan matter for both those categories of actors and for the ordinary people who their interactions serve Second the book highlights that these interactions are invariably complex The third theme which arises specifically from the PRT experience in Afghanistan is that such teams vary significantly in their roles resourcing and operational environments Consequently to appraise the value of the PRT experience it is necessary to unpack the experiences of different PRTs which the use of case studies allows one to do The volume comprises an introduction identifying some key questions to which the PRT experience gives rise and case studies of the experiences of the United States United Kingdom New Zealand Canada The Netherlands Australia Germany and France chapters dealing with the roles played by NGOs and the UN system and a discussion from an Afghan perspective of the implications of civilian casualties It is the combination of the diverse cases discussed in this book with a focus on the broad challenges of optimising civil military interactions that makes this book distinctive This book will be of much interest to students of the Afghan War civil military relations statebuilding Central Asian politics and IR in general **The Oxford**

Handbook of Religion, Conflict, and Peacebuilding Atalia Omer, R. Scott Appleby, David Little, 2015 The book provides a comprehensive overview of the literature on religion conflict and peacebuilding With a focus on structural and cultural violence the volume also offers a cutting edge interdisciplinary reframing of the scope of scholarship in the field
