Christopher R. Stones

Aids And Men Taking Risks Or Taking Responsibility:

AIDS and Men Martin Foreman, 1999 The global AIDS epidemic is driven by men Men have more opportunity to contract and transmit HIV men usually determine the circumstances of intercourse and men often refuse to protect themselves and their partners Even if no more than one in four men endangers themselves and their female or male partners this represents hundreds of millions of men whom is appears regularly act without thought for their partners Can men be persuaded to change their behaviour How do concepts of masculinity affect risks and responsibilities in relation to the epidemic The first section of this book examines the relationship between men s actions and AIDS world wide the impact of those actions on men and women and initiatives designed to help men protect themselves and their partners The second section written by journalists from eleven countries in the Americas Africa Asia and Eastern Europe illustrates many different aspects of that relationship from machismo in Mexico to drug injection in Russia from men in prison in Brazil to men living with HIV in Thailand from men as fathers in the Ivory Coast to men who have sex with men in Kenya Men undoubtedly take risks in relation to HIV Whether or not they should also take responsibility for transmission of the virus and how they can do so are questions that cannot be easily resolved This book provides some insights that allow a greater understanding of the issue

Socio-political and Psychological Perspectives on South Africa Christopher R. Stones, 2001 South Africa is a society that sadly has been divided against itself even at the best of times Beginning with the initial advent of colonialism on the southern tip of the African continent through to the later spawning of apartheid as well as in its nascent democracy divisions have continually been manifest in varying form and content along racial ethnic class religious language political or other socio economic and cultural lines Unlike most societies South Africa is a natural laboratory for psycho social research yet it has been foreign researchers who have conducted most of the behavioural studies on the human condition in the country South African psychologists seem to have steered clear of involvement in researching any major policy impact especially in recent times when the re shaping of South African society has been at its height Each of the authors in this book is South African and appropriately has lived through the transition in South Africa and has attempted to understand the changes at both professional and personal levels The contributors were each asked to write a chapter that would explore the South African socio political terrain from within their fields of expertise and so help others navigate the uncharted future with less trepidation
