

The Dynamic Sphere

If you combine all of those basic circuits and all the possible spirals and semi-spirals of neutralization around your Centre into a single image, the result is a sphere: a "Dynamic Sphere" of circuits enveloping you protectively as you channel any aggressive action into any one or combination of those circles according to the circumstances of each attack.

In the Dynamic Sphere, the concepts of the Centre (attitude) and the energy or extension (*ki*) as well as that of leading control are synthesized, providing a clear formula to which you can turn when seeking to resolve those functional problems which may arise during your practice of the art.

Any motion of attack (from in front of you, from behind you, or from either side), or any technique or method of attack (a blow, a hold, a combination) may be dynamically drawn into a circuit around your Centre and led away to its dispersion and/or neutralization.

Up to this point the Dynamic Sphere which we have examined, with all of its circuits, spirals, and semi-spirals of neutralization, has been linked to techniques of self-defense performed almost on the spot, usually against one attacker.

If you move along or across the surface of the mat, your functional command over an attack can be expanded to include the possibility of multiple attack, i.e., when two or more people attack you at the same time.

When you move your Centre, its protective sphere and its accompanying Circuits of Neutralization move with you, and spin around and about you in the direction of the attack, regardless of the side from which that attack may be launched.

Obviously it would be impossible to explore all the dynamic patterns which could be realized when linked to the Circuits of Neutralization discussed earlier.
