Marine Surface Films Martin Gade,Heinrich Hühnerfuss,Gerald M. Korenowski,2006-08-06 Since the late 1960s various groups have investigated the influence of marine surface films on mechanisms dominating energy and mass transfer across the ocean atmosphere interface However a compendium summarizing the state of the art research in this field is still missing The book fills this gap and transfers the accumulated knowledge to the scientific community After a brief historical chapter basic chemical insights are presented followed by theoretical and experimental approaches carried out in laboratory facilities Air sea interaction experiments are then described and finally remote sensing applications with sea slicks and crude oil spills are presented
