Fórmula Cuántica (Spanish Edition) R. Ligia Prieto Arango, 2019-07-08 Ciencia del Juego Inteligente Si estoy afirmando que esta obra enseña a una nueva ciencia he de aclarar que los conocimientos aquí develados por primera vez en la historia del juego al azar de loterías son exclusivos de todo aquello que se haya dicho al respecto Este compendio no es un manual de opiniones a priori Los números no son elegidos por conjeturas ni puntos de vista ni números de suerte ni de fechas de nacimiento etc Jugar de esta manera es hacerlo típicamente al azar mientras se derrocha dinero pasiva o activamente Y aunque los estudios estadísticos sean obtenidos de los conocimientos matemáticos únicamente se llega a la síntesis de resultados que ya sucedieron para saber cuáles números han ganado o perdido Pero si un número gana una o más veces es probable que después desaparezca Y si la cifra ha desaparecido es posible que continúe igual de cualquier forma hay que preguntarse En qué momento reaparecerá el número elegido En la historia de este tipo de juego nadie absolutamente nadie ha respondido afirmativamente a esta pregunta y la imposibilidad de saberlo no da cabida a preguntarlo Hasta el día de hoy que he empezado a solucionarlo Las investigaciones al respecto me condujeron a sintetizar el avance de este estudio en un nuevo teorema Todo cuerpo que se desplaza cíclicamente regresa siempre al principio Esto significa que el cuerpo se desplaza desde el pasado al presente y de este hacia el futuro en un fenómeno y tiempo circular He ahí el faltante de la Teoría de la Relatividad A partir de las partículas subatómicas de la energía los fenómenos físicos cíclicos se presentan hasta en las existencias más enormes del Universo Pues comparando los desplazamientos rotatorios mecánicos de los elementos movidos al azar y conociendo el tiempo cíclico es que logré descubrir el momento preciso o fecha para jugar los números de las loterías Estos secretos gravados por siempre en un cuantificador universal al que he llamado Fórmula Cuántica se aplica a cada número para programar cada apuesta Aunque no es para ganar las loterías diariamente en verdad funciona en una máxima probabilidad de acierto
