Assessing Mathematical Literacy The Pisa Experience:

Assessing Mathematical Literacy Kaye Stacey, Ross Turner, 2014-11-03 This book describes the design development delivery and impact of the mathematics assessment for the OECD Programme for International Student Assessment PISA First the origins of PISA's concept of mathematical literacy are discussed highlighting the underlying themes of mathematics as preparation for life after school and mathematical modelling of the real world and clarifying PISA's position within this part of the mathematics education territory The PISA mathematics framework is introduced as a significant milestone in the development and dissemination of these ideas The underlying mathematical competencies on which mathematical literacy so strongly depends are described along with a scheme to use them in item creation and analysis The development and implementation of the PISA survey and the consequences for the outcomes are thoroughly discussed Different kinds of items for both paper based and computer based PISA surveys are exemplified by many publicly released items along with details of scoring The novel survey of the opportunity students have had to learn the mathematics promoted through PISA is explained The book concludes by surveying international impact It presents viewpoints of mathematics educators on how PISA and its constituent ideas and methods have influenced teaching and learning practices curriculum arrangements assessment practices and the educational debate more generally in fourteen countries

Beyond Shanghai and PISA Binyan Xu, Yan Zhu, Xiaoli Lu, 2021-05-07 This book seeks to illustrate the research on mathematics competencies and disposition in China according to the conceptual development and empirical investigation perspective Mathematics education in China has a distinguishing feature a focus of attention to mathematical competency Paradoxically there has not been an explicit refined and measurable evaluation system in place to assess mathematical competency in China While academic achievement surveys or evaluations are common these can only give an overall conclusion about mathematical thinking skills or problem solving abilities In response to this deficiency China is beginning to carry out national projects that emphasize defining both a conceptual framework on core competencies in school mathematics and developing a corresponding assessment framework Thus the main focus of this volume is the current investigations of different mathematics competencies and mathematical disposition of Chinese students with the aim of promoting interaction between domestic and international student performance assessment to provide a more comprehensive understanding of mathematics competencies and disposition in mainland China and to stimulate innovative new directions in research The primary audience of this volume is the large group of researchers interested in mathematics competencies mathematics teaching and learning in China or comparative studies or the relation of the three The book will also appeal to teaching trainers or instructors as well as be an appropriate resource for graduate courses or seminars at either the master's or doctoral level

Learning and Teaching for Mathematical Literacy Hugh Burkhardt, Daniel Pead, Kaye Stacey, 2024-02-19 Typically most people don't realize when and how they can use the mathematics they were taught in high school yet many of the mathematical ideas and skills can be a powerful tool for understanding how the world works Learning and Teaching for Mathematical Literacy addresses this situation offering practical strategies for developing a broader vision of mathematical literacy in the classroom and recognising the importance of maintaining these skills into adult life Linked to the material explored throughout this book classroom activities and lesson materials are freely available for use via the QR codes included in each chapter Filled with case studies and classroom activities chapters tackle several topics Describing a framework for a broader vision of mathematical literacy what is it and why is it important Teaching mathematical literacy in the classroom Applying mathematical literacy to real life scenarios My dad is buying a new dishwasher Should he buy the extended warranty on offer My phone works fine but I've been offered an upgrade How should I decide whether to take it The role of technology in teaching mathematical literacy Designing mathematical measures for real world quantities Firmly grounded by practical

applications for the classroom and beyond this is an essential handbook for any teacher teaching assistant or mathematics subject lead who wishes to develop their students mathematical literacy skills This is also an ideal resource for those delivering or enrolled in teacher preparation courses

E-Pedagogy for the Digital Age Dr. P. C. Nagasubramani, Adult learners have more options for enrolling in postsecondary education than ever before and they are able to use their learning style preference in deciding which program best meets their needs For some of these students those programs are fully online and for others there is minimal use of technology As technology grows and become more integrated into individual lives the unique learning styles and preferences of adults need to learn to be incorporated into instructional design Drawing on a regional sample of US colleges 545 adult learners in a graduate programs were surveyed about how to effectively build community in their online classes Results indicated some agreement with these instructional tools Mature adult learners however were found to have stronger agreement with strategies that included work outside of the formal online class These results suggest perhaps a greater comfort for adults in working in spaces where there is less likelihood of being judged or graded and that they might value relational work with other students in different ways than younger adults

International Reflections on the Netherlands Didactics of Mathematics Marja van den Heuvel-Panhuizen, 2019-08-13 This open access book inspired by the ICME 13 Thematic Afternoon on European Didactic Traditions takes readers on a journey with mathematics education researchers developers and educators in eighteen countries who reflect on their experiences with Realistic Mathematics Education RME the domain specific instruction theory for mathematics education developed in the Netherlands since the late 1960s Authors from outside the Netherlands discuss what aspects of RME appeal to them their criticisms of RME and their past and current RME based projects It is clear that a particular approach to mathematics education cannot simply be transplanted to another country As such in eighteen chapters the authors describe how they have adapted RME to their individual circumstances and view on mathematics education and tell their personal stories about how RME has influenced their thinking on mathematics education
