The Making of Toro Mark Sundeen, 2004-05-07 Mark Sundeen receives a call from a big city publisher with an offer to write a book about bullfighting in Spain Sundeen agrees assuming that this is his best and last chance to follow the trajectory of his literary heroes despite the fact that he has never been to a bullfight doesn't speak Spanish and is not even a particularly good reporter After squandering most of the book advance Sundeen can't afford a trip to Spain so he settles for nearby Mexico But the bullfighting he finds there is tawdry and comical and there's little of the passion and bravery that he'd hoped to employ in exhibiting his literary genius to the masses To compensate for his own shortcomings as an author Sundeen invents an alter ego Travis LaFrance a swashbuckling adventure writer in the tradition of Sundeen's idol Ernest Hemingway When LaFrance steps in our narrator goes blundering through the landscape of his own dreams and delusions propelled solely by the preposterous insistence that his own life story no matter how crummy is worth being told in the pages of Great Literature The Making of Toro is a unique comic classic and a sly poignant tale of the hazards of trying too hard to turn real life into high art

Cramer,2018-02-21 This provocative book debunks the myth that American gun culture was intentionally created by gun makers and demonstrates that gun ownership and use have been a core part of American society since our colonial origins Revisionist historians argue that American gun culture and manufacturing are relatively recent developments They further claim that widespread gun violence was largely absent from early American history because guns of all types and especially handguns were rare before 1848 According to these revisionists American gun culture was the creation of the first mass production gun manufacturers who used clever marketing to sell guns to people who neither wanted nor needed them However as proven in this first scholarly history of gun culture in early America gun ownership and use have in fact been central to American society from its very beginnings *Lock Stock and Barrel* The Origins of American Gun Culture shows that gunsmithing and gun

manufacturing were important parts of the economies of the colonies and the early republic and explains how the American gun industry helped to create our modern world of precision mass production and high wages for workers

The Dignity of Commerce Nathan B. Oman, 2017-01-19 Why should the law care about enforcing contracts We tend to think of a contract as the legal embodiment of a moral obligation to keep a promise When two parties enter into a transaction they are obligated as moral beings to play out the transaction in the way that both parties expect But this overlooks a broader understanding of the moral possibilities of the market Just as Shakespeare's Shylock can stand on his contract with Antonio not because Antonio is bound by honor but because the enforcement of contracts is seen as important to maintaining a kind of social arrangement today's contracts serve a fundamental role in the functioning of society With *The Dignity of Commerce* Nathan B. Oman argues persuasively that well-functioning markets are morally desirable in and of themselves and thus a fit object of protection through contract law Markets, Oman shows, are about more than simple economic efficiency To do business with others we must demonstrate understanding of and satisfy their needs This ability to see the world from another's point of view inculcates key virtues that support a liberal society Markets also provide a context in which people can peacefully cooperate in the absence of political, religious, or ideological agreement Finally, the material prosperity generated by commerce has an ameliorative effect on a host of social ills, from racial discrimination to environmental destruction The first book to place the moral status of the market at the center of the justification for contract law *The Dignity of Commerce* is sure to elicit serious discussion about this central area of legal studies
