Robert H. Mnookin, **Conflict Resolution in the Twenty-first Century** Jacob Bercovitch,Richard Dean Wells Jackson,2009-09-08 In the past arbitration direct bargaining the use of intermediaries and deference to international institutions were relatively successful tools for managing interstate conflict In the face of terrorism intrastate wars and the multitude of other threats in the post Cold War era however the conflict resolution tool kit must include preventive diplomacy humanitarian intervention regional task sharing and truth commissions Here Jacob Bercovitch and Richard Jackson two internationally recognized experts systematically examine each one of these conflict resolution tools and describe how it works and in what conflict situations it is most likely to be effective Conflict Resolution in the Twenty first Century is not only an essential introduction for students and scholars it is a must have guide for the men and women entrusted with creating stability and security in our changing world Cover illustration iStockphoto com *Psychological Barriers to Conflict*

bringing together of these trends that holds the most promise for an effective system of international justice With great insight and passion built firmly on a vast knowledge of the field Lars Kirchhoff exposes the contemporary structural barriers to effective conflict resolution defining where adjudication ends and ADR and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play The work starts by defining the challenges potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way In the course of its investigation the book accomplishes the following illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically conveys the nature and consequences of intervention through mediation focusing on the method s critical challenges and clarifies the particular model of international mediation under development through UN initiatives In approaching these intertwined topics the author draws concrete conclusions for the realms of international law and related disciplines as well as for the organizational context of the United Nations He explores such diverse scenarios as conflicts between States conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication It is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice Although some of the reasons for this phenomenon are beyond the influence of scholarly debate in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature It is the great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be of immeasurable value and benefit to all scholars

policymakers and activists dedicated to the pursuit of peace      **Choices, Values, and Frames** Daniel Kahneman, Amos Tversky, 2000-09-25 This book presents the definitive exposition of prospect theory a compelling alternative to the classical utility theory of choice Building on the 1982 volume *Judgement Under Uncertainty* this book brings together seminal papers on prospect theory from economists decision theorists and psychologists including the work of the late Amos Tversky whose contributions are collected here for the first time While remaining within a rational choice framework prospect theory delivers more accurate empirically verified predictions in key test cases as well as helping to explain many complex real world puzzles In this volume it is brought to bear on phenomena as diverse as the principles of legal compensation the equity premium puzzle in financial markets and the number of hours that New York cab drivers choose to drive on rainy days Theoretically elegant and empirically robust this volume shows how prospect theory has matured into a new science of

decision making      **Foundations of Dispute Resolution** Carrie Menkel-Meadow, 2017-05-15 This volume brings together leading research articles in to the theory research findings and applications of modern dispute resolution The articles relate to a wide variety of settings and cover the primary processes of negotiation mediation and arbitration as well as exploring combinations and hybridization of those processes Also included are articles on the search for value added or pie expanding creative solutions the choosing of strategies based on game theory economics and social and cognitive psychology how foundational theories have been altered or modified depending on contexts and numbers of parties and issues and what issues are raised by the privatization of justice The articles span both the science and art of dispute resolution consider the relationship of peace to justice and include both empirical descriptive and normative prescriptive assessments of how these processes of dispute resolution function      *Multi-Party Dispute Resolution, Democracy and Decision-Making* Carrie Menkel-Meadow, 2017-05-15 The articles selected for this volume draw on game theory political science psychology sociology and anthropology to consider how the process of dispute resolution is altered challenged and made more complex by the presence of multiple parties and or multiple issues The volume explores issues of coalition formation defection collaboration commitments voting practices and joint decision making in settings of increasing human complexity Also included are examples of concrete uses of deliberative democracy processes taken from new applications of complex dispute resolution theory and practice The selected essays represent the latest theoretical advances and challenges in the field and demonstrate attempts to use dispute resolution theory in a wide variety of settings such as political decision making and policy formation regulatory matters environmental disputes healthcare community disputes constitutional formation and in many other controversial issues in the polity      **Promise and Performance Of Environmental Conflict Resolution** Rosemary O'Leary, Lisa Bingham, 2003-08-01 Environmental conflict resolution ECR is a process of negotiation that allows stakeholders in a dispute to reach a mutually satisfactory agreement on their own terms The tools of ECR such as facilitation mediation and conflict assessment suggest that it fits well with other ideas for reforming environmental policy First used in 1974 ECR has been an official part of policymaking since the mid 1990s The Promise and Performance of Environmental Conflict Resolution is the first book to systematically evaluate the results of these efforts The Promise and Performance of Environmental Conflict Resolution presents empirical research along with insights from some of ECR s most experienced practitioners Beginning with a primer about concepts and methods the book describes the kinds of disputes where ECR has been applied making it clear that despite the faith of proponents in the power and usefulness of ECR it is not applicable to all environmental conflicts The contributions that follow critically investigate the record and potential of ECR drawing on perspectives from political science public administration regional planning philosophy psychology anthropology and law ECR is being extended to almost every area of environmental policy Rosemary O Leary and Lisa Bingham argue that truly effective use of ECR requires something more than advocacy The Promise and Performance of Environmental Conflict Resolution

provides scholars policymakers students and practitioners with critical assessments so that ECR can be used to its best advantage
