differences rather than simply tolerating them Research shows that while biases begin to develop at age 6 their origins begin much earlier Unfortunately diversity and culture are treated as though they are grownup concepts as if children don't recognize that diversity is all around them Human beings naturally categorize and your kids will develop preferences prejudices and opinions about people who are different from them Therefore it is important for parents to take an active role in helping their children see understand and develop their understanding of people and cultures that are different As Dr Sweeney says We don't have to all be friends or even like each other to treat each other with respect This book provides a science based framework with ideas and options to explore as you embark on this cultural competence journey with your kids and also with yourself

The Writings of Mark Twain [pseud.]: Following the equator; a journey around the world Mark Twain, 1904 **Following the Equator** Mark Twain, 1899 Following The Equator Mark Twain, 2014-04-14 A happy and interesting jumble is this book of Mark Twain's It is like a lucky bag at a fair In his zigzag journey around the world the humorist has made a collection of odds and ends of fun philosophy and fantastic description such as has never been gathered in the pages of a single book and any one dipping in at random is sure of a prize The heterogeneous mass has some pretense of being loosely strung together but it is on a line as long as the Equator itself It is a traveler's miscellany a globe trotter's hotch potch a sociologist's cabinet of specimens all bearing the quaint labelings of the creator of Pudd'nhead Wilson Here is a rare bit of humor surreptitiously picked up in a New Zealand drawing room there a sample fragment of a life tragedy which the trophy hunter knocked off Molokai This division of the cabinet contains an incident from the stage door of a New York theater that next to it a unique string of anecdotes of tiger hunting in Baroda And according to the labels many of the specimens were picked up in very unexpected places as for instance the yarn about Barnum which the collector found in Delagoa bay But wherever found or however incongruously grouped this cabinet of odds and ends of life is one of the most interesting and unique collections ever made by a traveler
