Absolute Beneath The Relative And Other Essays:

The Absolute Beneath the Relative and Other Essays Stanley L. Jaki, 1988 The exploitation of Einstein's relativity theory on behalf of the relativization of all norms and values is the most conspicuous aspect of a culturally disastrous trend which in its various ramifications is the critical target of this book Students of history psychology sociology and metaphysics will find much food for thought and rich material in this latest of the author's long standing efforts aimed at the demythologization of science This book presents fourteen not readily available essays of the winner of the Templeton Prize for 1987 Co published with the Intercollegiate Studies Institute

The Book of Absolutes William D. Gairdner, 2008-08-21 A lively challenge to postmodern opinion that reveals satisfying and reliable certainties

Mystery Of Time, The: Asymmetry Of Time And Irreversibility In The Natural Processes Alexander Leonidovich Kuzemsky, 2022-10-14 The book focuses on the study of the temporal behavior of complex many particle systems The phenomenon of time and its role in the temporal evolution of complex systems is a remaining mystery The book presents the necessity of the interdisciplinary point of view regarding on the phenomenon of time The aim of the present study is to summarize and formulate in a concise but clear form the trends and approaches to the concept of time from a broad interdisciplinary perspective exposing tersely the complementary approaches and theories of time in the context of thermodynamics statistical physics cosmology theory of information biology and biophysics including the problem of time and aging Various approaches to the problem show that time is an extraordinarily interdisciplinary and multifaceted underlying notion which plays an extremely important role in various natural complex processes

A Thomistic Tapestry, 2021-12-28 This book written by well known students of Etienne Gilson and especially dedicated to Armand A Maurer helps inaugurate a long overdue special series in philosophy honoring Gilson's legendary scholarship It presents wide ranging expositions of Thomist realism in the tradition of Gilsonian humanism covering themes related to philosophy in general historical method aesthetics metaphysics epistemology and politics

Beyond Secularism and Jihad? Peter D. Beaulieu, 2012-07-13 Peter D Beaulieu examines the challenge posed by and to modernity and historic Islam as they encounter one another He compares the Western separation of Church and state with the unitary Islamic State and explores the proposed cultural and societal principles of the Second Vatican Council as potentially influencing long term events in both arenas Beaulieu's research is comprehensive and richly documented yet offers an accessible triangular inquiry into the mosque the manger and modernity By restoring a place at the table for Trinitarian Christianity alongside the engulfing monotheism of Islam and the alternative skepticism of Western rationalism this inquiry broadens the pallet of inter religious and intercultural contact points Beyond Secularism and Jihad provides balanced attention to the differences as well as the similarities between Christianity Islam and modernity An emerging theme is natural law which is universal and intrinsic to all mankind and not confined to competing theologies Neglected in the West that it helped create natural law might contribute to the needed grammar for dialogue between the citizens in the West and

the followers of Islam The Only Chaos and Other Essays Stanley L. Jaki,1990 This new collection of essays continues the same theme which Jaki frequently addresses that of the development of intellectual strategy to protect the worth of the human being in a scientific and technological age The physicist theologian brings us face to face with relativism the only chaos and steers us clear of two philosophies physicalism in which increased quantification is supposed to bring us nearer to the source of knowledge and a bucolic humanism which decries technology while reaping its benefits Jaki's analyses are useful examples to students in the disciplines combatting deconstructionism the new historicism and cultural relativism Co published with the Intercollegiate Studies Institut *The Mystery of Reason* Paul Haffner,2001 The Mystery of Reason investigates the enterprise of human thought searching for God People have always found stepping stones to God's existence carved in the world and in the human condition This book examines the classical proofs of God's existence and affirms their continued validity It shows that human thought can connect with God and with other aspects of religious experience Moreover it depicts how Christian faith is reasonable and is neither blind nor naked Without reason belief would degenerate into fundamentalism but without faith human thought can remain stranded on the reef of its own self sufficiency This book proposes that the human mind must be in partnership with the human heart in any quest for God Paul Haffner is lecturer in systematic and dogmatic theology in Rome at the Pontifical Gregorian University the Pontifical Lateran University and the Pontifical Athenaeum Regina Apostolorum In this series he has published The Mystery of Creation The Mystery of Mary and The Sacramental Mystery The Big Book of Christian Apologetics Norman L. Geisler,2012-11-01 The Big Book of Christian Apologetics is a comprehensive resource designed to equip motivated believers with information to help defend and explain their faith Examining nearly every key issue person and concept related to Christian apologetics this book clarifies difficult biblical passages clearly explains various philosophical systems and concepts examines contemporary issues and challenges and offers classic apologetic arguments all with the aim of giving readers the background to intelligently and persuasively talk about their Christian faith with skeptics An expertly abridged version of the Baker Encyclopedia on Christian Apologetics this resource brings leading apologist Norman L Geisler's seminal work to the masses **Jerusalem and Athens** Susan Orr,1995 Leo Strauss dedicated his life to rejuvenating the serious study of political philosophy But those who study his writings are at odds on the question of what he thought about revelation By applying Strauss's own principles of analysis to his pivotal essay Jerusalem and Athens Some Preliminary Reflections Susan Orr reveals that Strauss's understanding of religion contrary to what previous scholars have maintained was more than simply political **Is There a Universe?** Stanley L. Jaki,1993-01-01 Is there a Universe Bafflingly scientific cosmologists from Einstein to Hawking have invariably failed to face up to this question This is all the more curious because some of them have claimed to know that the universe can only be such as prescribed by their theories Some even claimed that their expertise enables them to create in theory at least entire universes literally out of nothing For their strange attitudes towards the universe this greatest object of empirical

human enquiry scientists have not been taken to task by philosophers No wonder The universe has become orphaned by modern philosophy In this book the author a renowned historian and philosopher of science and especially of astronomy and cosmology probes into this puzzling state of affairs He also points out that slighting the question Is there a Universe has serious consequences for science as well as for philosophy to say nothing of theology Most importantly he shows that it is possible to answer the question Is there a Universe in a convincingly demonstrative way

Ignite the flame of optimism with Crafted by is motivational masterpiece, Find Positivity in **Absolute Beneath The Relative And Other Essays** .
