Albert Frey Houses 1 And 2:

Albert Frey House 1 + 2 Slipcase Jennifer Golub, Albert Frey, 1998-09 This monograph showcases two houses architect Albert Frey built for himself in the Southern California desert In keeping with Frey s principles of paralleling the simplicity of nature in his work both houses have a modern aesthetic but are fully incorporated into their natural surroundings **Albert Frey, Architect** Joseph Rosa, 1999-11 Lavishly illustrated with over 200 duotone plates many by noted photographer Julius Shulman *The Grove Encyclopedia of American Art* Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries California Modern Neil Jackson, 2002 In the 1950s a series of dramatic open and elegant homes made him a media star and interest in the work of his atelier has only increased over time Albert Frey Houses 1 + 2 Jennifer Golub, 1999-04-01 Albert Frey worked in Le Corbusier s atelier in Paris but he is most closely associated with the 1940s and 1950s desert architecture of Southern California and with the work of architects such as Richard Neutra and John Lautner This exquisitely designed monograph on Albert Frey focuses on two houses he built for himself in Palm Springs California one in 1941 with an addition in 1953 and the other in 1964 Although both houses have a modern aesthetic including glass walls and concrete construction they are fully incorporated into their surroundings in keeping with Frey s principles of paralleling nature in his work This title which was developed in collaboration with Frey himself includes color and duotone photographs commissioned especially for this book The book is exquisitely made and comes in a plastic slipcase Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world s most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 **The New Eco-Architecture: Alternatives from the Modern Movement** Colin Porteous, 2013-10-11 The New Eco Architecture builds a historical bridge between architectural science and design It seeks to address neglected aspects of the Modern Movement as a prelude to supporting a diversity of architectural insight and experimentation aimed at twenty first century environmental needs and priorities The attitudes and influences of renowned figures are re examined in relation to current issues of architectural sustainability By setting today s green architectural quest within a twentieth century context and evaluating the main protagonists with regard to a modern eco sensitive lineage the book will be of primary interest to architectural students academics and practitioners However it should also intrigue historians theoreticians and critics who tend to gloss over such issues as well as other disciplines engaged with the built environment **Richard Neutra's Miller House** Stephen Leet, 2004-04 In 1937 the architect and

his sophisticated client produced a masterwork of forward thinking and artful architecture

The Palm Springs School: Desert Modernism 1934-1975 Alan Hess, 2025-02-11 Palm Springs is at the center of a unique tradition in architecture marked by invention and a sensitivity to local conditions that has resulted in design that exerts an influence far greater than the town's small size. The book is the first to fully explore the wide-ranging forms this architecture has taken from houses to gas stations, hotels to airports, banks to restaurants and spas. Much more than a resort destination, Palm Springs has served as a laboratory of the Modern here so much architectural innovation and design took form. From the steel and glass boxes of Richard Neutra to the earthy organic homes of John Lautner and everything in between, the solutions of architects and designers including notably William F. Cody, E. Stewart Williams and Albert Frey were diverse and are ever more relevant in the face of contemporary challenges. Their answers addressed questions that still hold urgency: How to design sustainably in harsh climates. How to use technology efficiently and creatively to meet those challenges. How to build affordable and high-quality mass-produced housing. How to reflect a region's culture, economy and distinctive atmosphere. Architects here responded to nature's climatological demands and Palm Springs became a center for innovations that were rooted in practice more than theory. Benefitting from the architectural freedoms offered by the remoteness of the California desert, designers explored new approaches that we can now identify as central to the Palm Springs School, shown here in rich archival and contemporary photography.

The Modern Steel House Neil Jackson, 2016-03-23 This book provides a comprehensive survey of Modern Movement houses constructed with steel frames. Arranged chronologically and thematically, it traces the development over the last seventy years of steel houses in Europe, Australia and the United States, with special reference to London, Paris, Sydney and Los Angeles, and to the work elsewhere of Mies van der Rohe, Philip Johnson and Jean Prouvé. Examples of steel houses from around the world demonstrate that steel structures can provide a better quality of life within a cleaner, lighter home environment.
