Individual chapters outline specific adaptive behaviors across a range of neurodevelopmental disorders giving clinicians practitioners students and researchers a better understanding of diagnostic differentials and how to place independent skill programming in treatment and intervention. Plan intervention and treatment based on accessible measurement guidelines across a range of disorders. Gain a deeper understanding of adaptive functioning specific to ADHD autism spectrum disorders disruptive behavior disorders and genetic disorders. Compare and contrast current measures to evaluate their strengths weaknesses and areas of overlap. Quickly locate essential information with Rapid Reference and Caution boxes. For individuals with neurodevelopmental disorders adaptive behaviors are the keys to independence without them these individuals will perpetually struggle with achieving optimum independence without the basic skills needed to function at home in school and in the community.
