A Feminist Legacy Suzanne Bordelon, 2009-03-10. This first book-length investigation of a pioneering English professor and theorist at Vassar College, *A Feminist Legacy: The Rhetoric and Pedagogy of Gertrude Buck*, explores Buck's contribution to the fields of education and rhetoric during the Progressive Era. By contextualizing Buck's academic and theoretical work within the rise of women's educational institutions like Vassar College, the social and political movement toward suffrage, and Buck's own egalitarian political and social ideals, Suzanne Bordelon offers a scholarly and well-informed treatment of Buck's achievements that elucidates the historical and contemporary impact of her work and life. Bordelon argues that while Buck did not call herself a feminist, she embodied feminist ideals by demanding the full participation of her female students and by challenging power imbalances at every academic, social, and political level. *A Feminist Legacy* reveals that Vassar College is an undervalued but significant site in the history of women's argumentation and pedagogy. Drawing on a rich variety of archival sources, including previously unexamined primary material, *A Feminist Legacy* traces the beginnings of feminist theories of argumentation and pedagogy and their lasting legacy within the fields of education and rhetoric.

Inference in Argumentation Edo Rigotti, Sara Greco, 2018-12-10. This book investigates the role of inference in argumentation, considering how arguments support standpoints on the basis of different loci. The authors propose and illustrate a model for the analysis of the standpoint-argument connection called the Argumentum Model of Topics (AMT). A prominent feature of the AMT is that it distinguishes within each and every single argumentation between an inferential-procedural component on which the reasoning process is based and a material-contextual component which anchors the argument in the interlocutors' cultural and factual common ground. The AMT explains how these components differ and how they are intertwined within each single argument. This model is introduced in Part II of the book following a careful reconstruction of the enormously rich tradition of studies on inference in argumentation from antiquity to contemporary authors, without neglecting medieval and post-medieval contributions. The AMT is a contemporary model grounded in a dialogue with such tradition, whose crucial aspects are illuminated in this book.
