Gillett, 2009

From the Book's Foreword Long awaited Mary C Gillett's final work *The Army Medical Department 1917 1941* complete her four volume study covering the years from 1775 to 1941. Although the Medical Department had improved medical standards and practices because of the latest advances in scientific medicine and was making significant progress toward creating an organizational structure and a supply system able to handle the demands of a conflict of any size its reserves of trained personnel and supplies were seriously inadequate when the nation entered world War I in the spring of 1917. The narrative first describes the struggle of an unprepared department to meet the myriad demands of a war unprecedented size and complexity then follows postwar efforts to meet the needs of the peacetime army during nearly two decades of continental isolationism and budgetary neglect and finally covers the brief period of growing awareness of America's involvement in another major conflict and the intensive preparation efforts that ensued.
