Reauthorization of the Satellite Television Extension and Localism Act United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Communications, Technology, and the Internet, 2015 FCC Record United States. Federal Communications Commission, 2017 **Content Distribution for Mobile Internet: A Cloud-based Approach** Zhenhua Li, Yafei Dai, Guihai Chen, Yunhao Liu, 2023-02-14 Content distribution i.e. distributing digital content from one node to another node or multiple nodes is the most fundamental function of the Internet. Since Amazon's launch of EC2 in 2006 and Apple's release of the iPhone in 2007, Internet content distribution has shown a strong trend toward polarization. On the one hand, considerable investments have been made in creating heavyweight integrated data centers heavy cloud all over the world in order to achieve economies of scale and high flexibility efficiency of content distribution. On the other hand, end user devices light end have become increasingly lightweight mobile and heterogeneous, creating new demands concerning traffic usage, energy consumption, bandwidth, latency, reliability, and the security of content distribution. Based on comprehensive real world measurements at scale, we observe that existing content distribution techniques often perform poorly under the abovementioned new circumstances. Motivated by the trend of heavy cloud vs. light end, this book is dedicated to uncovering the root causes of today's mobile networking problems and designing innovative cloud-based solutions to practically address such problems. Our work has produced not only academic papers published in prestigious conference proceedings like SIGCOMM, NSDI, MobiCom, and MobiSys, but also concrete effects on industrial systems such as Xiaomi Mobile, MIUI OS, Tencent App Store, Baidu PhoneGuard, and WiFi.com. A series of practical takeaways and easy-to-follow testimonials are provided to researchers and practitioners working in mobile networking and cloud computing. In addition, we have released as much code and data used in our research as possible to benefit the community. *Harvard Law Review: Volume 127, Number 3 - January 2014* Harvard Law Review, 2014-01-15. The January 2014 issue, Volume 127 Number 3, includes the following articles and student contributions: Article For Profit Public Enforcement by Margaret H. Lemos and Max Minzner; Book Review Technological Determinism and Its Discontents by Christopher S. Yoo; Note More than a Formality: The Case for Meaningful Substantive Reasonableness Review; Note Appointing State Attorneys General; Evaluating the Unbundled State Executive; Note The Devil Wears Trademark: How the Fashion Industry Has Expanded Trademark Doctrine to Its Detriment. In addition, student case notes explore recent cases on misleading law school employment data, the First Amendment religious rights of for-profit corporations, regulation of nuclear energy, forensic search of laptops at the border, search of cellphone data incident to arrest, obscene or lewd student speech, and access to polling places for news gathering purposes. Finally, the issue includes several summaries of Recent Publications. The issue is offered in a quality digital edition featuring active Contents, linked notes, active URLs in notes, and proper ebook formatting. The contents of Number 3 include scholarly essays by leading academic figures as well as substantial student

Litan, Hal J. Singer, 2013-01-30 The twenty first century telecommunications landscape is radically different from the one that prevailed as recently as the last decade of the twentieth century Robert Litan and Hal Singer argue that given the speed of innovation in this sector the Federal Communications Commission's outdated policies and rules are inhibiting investment in the telecom industry specifically in fast broadband networks This pithy handbook presents the kind of fundamental rethinking needed to bring communications policy in line with technological advances Fast broadband has huge societal benefits enabling all kinds of applications in telemedicine entertainment retailing education and energy that would have been unthinkable a few years ago Those benefits would be even greater if the FCC adopted policies that encouraged more broadband providers especially wireless providers to make their services available in the roughly half of the country where consumers currently have no choice in wireline providers offering download speeds that satisfy the FCC's current standards The authors recommendations include allowing broadband providers to charge for premium delivery services embracing a rule of reason approach to all matters involving vertical arrangements stripping the FCC of its merger review authority because both the Federal Trade Commission and the Justice Department have the authority to stop anticompetitive mergers eliminating the FCC's ability to condition spectrum purchases on the identity business plans or spectrum holdings of a bidder and freeing telephone companies from outdated regulations that require them to maintain both a legacy copper network and a modem IP network These changes and others advanced in this book would greatly enhance consumer welfare with respect to telecommunications services and the applications built around them
