Built to Change (Summary) Edward E. Lawler III, 2006 getAbstract Summary Get the key points from this book in less than 10 minutes This is a bold fascinating and occasionally dangerous book which getAbstract recommends to those who want to plan carefully and honestly for the future Why carefully and honestly Because authors Edward E Lawler III and Christopher G Worley are savvy enough to identify the kind of organization best suited for a business environment shaped by continuous change and bold enough to prescribe the actions leaders must take to survive in this environment These actions require care and honesty because they differ so fundamentally from many past business practices For example the idea of continually re planning your market position sounds straightforward However to then eliminate all employees who have done great work but whose skill base does not match the firm's new portfolio is risky and requires great faith in your vision As the authors repeatedly note the future is difficult to predict and impossible to predict completely What's more for individual managers to examine their organizations see that they no longer fit and voluntarily step aside will require rigorous honesty and responsibility They would need to have planned their careers and finances well enough that self interest does not blind them Many of this book's ideas have a similar nature They seem good and right but applying them successfully will require great discipline Book Publisher Jossey Bass

Building More Effective Organizations Ronald J. Burke, Cary L. Cooper, 2007-12-13 Organizations today are facing heightened challenges in their efforts to perform effectively. These challenges are reflected in the failure of many long-standing organizations and the shortened tenure of senior level executives. There is increasing agreement that the unique competitive advantage organizations have today lies in their people, their human resource management practices, and their cultures. All other elements of production can be readily obtained, bought or copied. We are now in the era of human capital; to be successful, organizations need to unleash the talents of their people. Fortunately, we now have considerable understanding of what high performing organizations look like. However, a large gap still exists between what we know and what managers actually do. With contributions from a team of leading academics and practitioners, *Building More Effective Organizations* provides an extensive survey of human resource management and the organizational practices associated with the high performance of individuals.
