Bully For Brontosaurus Reflections In Natural History:

Bully for Brontosaurus Stephen Jay Gould, 1992-05-05 Essays from the author's column This view of life published in Natural history *Bully for Brontosaurus* Stephen Jay Gould, 1991-01 *Bully for Brontosaurus* P. Goulet, 1991 Stephen Jay Gould and the Politics of Evolution David F. Prindle, **The Field** Douglas Booth, 2007-05-07 2006 North American Society for Sports History Book of the Year The literature on sport history is now well established taking in a wide range of themes and covering every activity from aerobics to zorbing However in comparison to most mainstream histories sport history has rarely been called upon to question its foundations and account for the basis of its historical knowledge In this book Booth offers a rigorous assessment of sport history as an academic discipline exploring the ways in which professional historians can gather materials construct and examine evidence and present their arguments about the sporting past Part 1 examines theories of knowledge while Part 2 goes on to scrutinize the uses of historical knowledge in popular and academic studies of sport history With clear structure examples summary tables and a detailed glossary The Field provides students teachers and researchers with an unparalleled resource to tackle issues fundamental to the future of their subject and sets the agenda for the debate to come **Evolution and Belief** Robert J. Asher, 2012-02-23 Asher draws on his experiences as a paleontologist and a religious believer arguing that science does not contradict religious belief The Politics of Evolution David Prindle, 2015-04-10 The controversy over teaching evolution or creationism in American public schools offers a policy paradox Two sets of values science and democracy are in conflict when it comes to the question of what to teach in public school biology classes Prindle illuminates this tension between American public opinion which clearly prefers that creationism be taught in public school biology classes versus the ideal that science and only science be taught in those classes An elite consisting of scientists professional educators judges and business leaders by and large are determined to ignore public preferences and teach only science in science classes despite the majority opinion to the contrary So how have the political process and the Constitutional law establishment managed to thwart the people's will in this self proclaimed democracy Drawing on a vast body of work across the natural sciences social sciences and humanities Prindle explores the rhetoric of the evolution issue explores its history examines the nature of the public opinion that causes it evaluates the Constitutional jurisprudence that upholds it and explains the political dynamic that keeps it going This incisive analysis is a must read in a wide range of disciplines and for anyone who wants to understand the politics of biology JT Wilson and the Fraternity of Duckmaloi Patricia Morison, 2019-12-01 In the 1890s four young scientists at Sydney University two Scots a Londoner and an Australian began sustained research into Australian native fauna for which each was awarded the FRS They all went on to pursue notable careers in the biological sciences concluding in London 46 8 and Cambridge This book follows their careers and enduring friendship exploring in detail the life of its senior member J T Wilson 1861 1945 who was professor of anatomy at Sydney University 1890 1920 and Cambridge 1920 1933 and had abiding interests in science

philosophy education and military affairs The narrative is mainly concerned with issues of historical interest to scientists and medical educationists though some like Empire relations and the contribution of Scots to Australia s development will interest a wider readership Many of the preoccupations of Wilson and his colleagues remain topical the debate between biological science and religion the struggle to interpret Darwin s theory without placing Homo sapiens at the top of an evolutionary tree pure versus applied science vocationalism versus scholarship in university education

New Perspectives on Adam Smith's The Theory of Moral Sentiments Geoff Cockfield, Ann Firth, John Laurent, 2007-11-27 New Perspectives on Adam Smith s The Theory of Moral Sentiments is a comprehensive study of Smith s ideas It brings together themes and methodologies from a variety of fields including politics sociology intellectual history history of science and evolutionary psychology

Oracles of Science Karl Giberson, Mariano Artigas, 2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don t reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic
