Stealing Fire Steven Kotler, Jamie Wheal, 2017-02-21 National Bestseller CNBC and Strategy Business Best Business Book of the Year It's the biggest revolution you've never heard of and it's hiding in plain sight Over the past decade Silicon Valley executives like Eric Schmidt and Elon Musk Special Operators like the Navy SEALs and the Green Berets and

maverick scientists like Sasha Shulgin and Amy Cuddy have turned everything we thought we knew about high performance upside down. Instead of grit, better habits, or 10 000 hours, these trailblazers have found a surprising short cut. They're harnessing rare and controversial states of consciousness to solve critical challenges and outperform the competition. New York Times bestselling author Steven Kotler and high performance expert Jamie Wheal spent four years investigating the leading edges of this revolution from the home of SEAL Team Six to the Googleplex, the Burning Man festival, Richard Branson's Necker Island, Red Bull's training center, Nike's innovation team, and the United Nations Headquarters. And what they learned was stunning. In their own ways, with differing languages, techniques, and applications, every one of these groups has been quietly seeking the same thing: the boost in information and inspiration that altered states provide. Today, this revolution is spreading to the mainstream, fueling a trillion dollar underground economy and forcing us to rethink how we can all lead richer, more productive, more satisfying lives. Driven by four accelerating forces: psychology, neurobiology, technology, and pharmacology, we are gaining access to, and insights about, some of the most contested and misunderstood terrain in history. *Stealing Fire* is a provocative examination of what's actually possible, a guidebook for anyone who wants to radically upgrade their life.

Cosmic Citizens and Moonshot Thinking Rohan Roberts, 2018-08-16

From award-winning educator, innovation expert, and Global Teacher Prize finalist, Rohan Roberts comes a provocative look at why our current education system is not fit for purpose and why we need to overhaul it. *Cosmic Citizens and Moonshot Thinking: Education in an Age of Exponential Technologies* takes a fresh approach to what we need to do differently to prepare our children for a world of exponential technologies, disruptive innovations, and ubiquitous AI. In this groundbreaking book, Roberts outlines the purpose of education in a world of increased outsourcing and automation and explains how we can future-proof our youth to survive and thrive in a world of accelerating change. Through interactions with corporate leaders, interviews with principals, meetings with parents, and surveys of students, this book considers how the best and brightest students would overhaul their education system. The book highlights the role of neuroscience in education and explores several fascinating concepts, such as radical openness, abundance mindsets, the gig economy, the technological singularity, intelligent optimism, the age of imagination, humanics, transhumanism, and the importance of Enlightenment values as we advance into the 21st Century. Underpinning this book is a constant focus on the importance of bringing a sense of awe into education and fostering a sense of cosmic wonder when contemplating human purpose and human existence. Written in a style that is discursive, contemplative, and with a sense of urgency, this book will appeal to students, parents, teachers, school principals, and to anyone who recognises that the only real and long-lasting way to create a better society is to first fix our education system.
